## **INTRODUCTION**

The Mikhail Klochko Papers were acquired in 1986 from the estate of Mikhail Klochko. His books were transferred to the National Library and the archival material was acquired by the National Archives of Canada. His medals and awards were transferred to the Documentary Art and Photography Division.

A modified Library of Congress system of Russian transliteration is used in this finding aid, however, some names, titles and other words previously transliterated according to other systems were left in their original form.

This collection is of special interest to researchers in the history of the Cold War, modern Soviet history and in Soviet science and scientists.

## BIOGRAPHICAL NOTE

Mikhail Antonovich Klochko was born in 1902 in the Poltava region of Ukraine, then part of the Russian Empire. After graduating in 1925 from the Kiev Polytechnical Institute, he engaged in research activity there, and beginning in 1930, at the U.S.S.R. Academy of Sciences in Leningrad (1930-1934) and in Moscow (1935-1961) at the Kurnakov Institute of General and Inorganic Chemistry.

He received the degree of Doctor of Chemical Sciences in 1940 as well as the title of Professor of Physical Chemistry in 1946. He visited England (1934-1935), France (1935), Austria (1956), and India (1959) on scientific missions and meetings. Dr. Klochko also worked in China, as a scientific consultant, in 1958 and 1960.

Dr. Klochko published over ninety experimental and theoretical papers, most dealing with various branches of electrochemistry in addition to several non-scientific works. For his research work, he was awarded the orders of the "Labor Red Banner" and the "Badge of Honor" along with the Stalin Prize (1948) for work on the electrochemistry of platinum metals and the Order of Chinese-Soviet Friendship.

Mikhail (Michael) Klochko visited Canada and defected in August 1961. He was accepted as a landed emigrant in Canada in 1961 and was granted Canadian citizenship in 1966. Based in Ottawa, he worked as a scientific consultant to the International Nickel Company (1963-1975) and to both the Department of Energy, Mines and Resources and of Environment and the Defence Research Establishment. Dr. Klochko concentrated his studies on the problem of efficient high density storage batteries, the environment, and the history of Russian and Soviet science.

Dr. Klochko adopted several pseudonyms while in Canada. These names appear on various papers in the collection: scientific research under "Shewchuk"; personal correspondence to "Mak"; legal matters for "Vladimir Petrov"; and fiction by "Karpov" and "Derevianko".

Dr. Klochko died in Ottawa on 10 June 1986, at the age of 83.
