## **Rosalie Bertell fonds**

### **MG 31 K 39**

#### **Biographical Description**

Dr. Rosalie Bertell was born at Buffalo, New York, in 1929. She received a doctorate in mathematics, with a specialty in biometrics, from the Catholic University of America, Washington, D.C. (Biometrics is the science of mathematical predictions of medical phenomenon). She is a member of the Grey Nuns of the Sacred Heart.

Since 1969, she has studied cancer and birth defects, especially as they relate to low level radiation exposure and has been a research consultant in biometry, with specialty in public health aspects of exposure to ionizing radiation. She was the Senior Cancer Research Scientist, Tri-State Leukemia Survey at Roswell Park Memorial Institute, Buffalo, N.Y., 1970 to 1978 and was instrumental in founding the Ministry of Concern for Public Health in Buffalo, N.Y. in 1978.

Coming to Canada in 1980, she became an Energy and Public Health Specialist with the Jesuit Centre for Social Faith and Justice, Toronto, 1980 to 1984. She founded the non-profit International Institute of Concern for Public Health and served as its Director of Research and Director of the Board, from 1984 to 1987 and as president from 1987 to 1994. The institute provided scientific and technical assistance to government agencies, citizens' groups and labour unions relating to environmental hazards as well as a scientific publication on environmental hazards. Dr. Bertell was appointed to the Scientific Advisory Board on the Great Lakes of the International Joint Commission, 1991-1995, and to the International Joint Commission's Nuclear Task Force in 1995. She was a consultant with the United States Nuclear Regulatory Commission and the United States Environmental Protection Agency. She currently serves on Advisory Boards to the Great Lakes Health Effects Program of Health Canada, the Ontario Environmental Assessment Board, Global Education Associates (New York) and the NGO Disarmament Committee at the United Nations.

She advocates stricter safeguards and better monitoring of health for nuclear workers and the general public, a phase out of nuclear technology for weapons or power generation, waste isolation rather than disposal, standardized international monitoring of environmental and human health, and protection of the biosphere from genotoxic damage.

Dr. Bertell has published extensively in her field including the book *No Immediate Danger: Prognosis for a Radioactive Earth*, which was first published in 1985, and is editor-in-chief of the periodical, *International Perspectives in Public Health*.

The Bertell archival records and the records of the International Institute of Concern for

Public Health were received from Dr. Bertell in 1995, 1996 and 2001.

### **The Bertell fonds**

The fonds documents Dr. Bertell's research and activities to identify global environmental hazards and their effects on public health, with special emphasis on the hazards of radiation caused by global dependence on nuclear energy. In addition, Dr. Bertell's work and research on international human rights' issues, the military and nuclear weapons, and women's health are documented.

### **The International Institute of Concern for Public Health sous-fonds or sub-fonds**

The sous-fonds or sub-fonds consists of the records of the International Institute of Concern for Public Health documenting international, national and local environmental issues.

### **Notes on the structure of the fonds**

Information on subjects and individuals overlaps different series because of the series structure. Additional material received in 1996, 2003 and 2003 was incorporated into the existing series and required some non-consecutive volume numbering, e.g., Case Files: vols. 10 to 42, 129, 132, 133 and 137, 139 to 150. There are series which properly relate to Dr. Bertell and her work and series which are attached to the records of the International Institute of Concern for Public Health.

### **Multiple Media Records and the Bertell library of periodicals and reports**

Sound recordings, video recordings, photographs, slides and posters have been transferred to the Visual and Sound Archives Division. Dr. Bertell's extensive library of periodicals, newspapers, and other publications have been transferred to the University of Guelph via Dr. Karen Farbridge, Executive Director, Ontario Public Interest Research Group. However, a database containing descriptions of the contents of this library may be consulted here.

### **Access Considerations**

Researchers are requested to sign an undertaking that they will not publish information about living persons without their knowledge and consent. Certain volumes contain individual files with sensitive information and access to these specific volumes is restricted.

### **Finding Aid No. 2081**

Finding aid no. 2081 provides a listing of file titles by series for volumes 1 to 150 of the textual and the electronic records. Also provided is a general listing of most multiple media material transferred to the Visual and Sound Archives Division. The automated version of the finding aid, a WordPerfect 6.1 document, should be consulted to locate information which appears in several series about a specific topic or individual. The search function in WordPerfect is useful for this type of action.

## Series Descriptions

### **Original Writings, 1942-2000, 1.35 m. Volumes 1 to 6 and 143.**

Series consists of affidavits, articles, drafts of chapters of books, interviews, lectures, letters to newspaper editors, poems, speeches at conferences, statements and testimony before legislative bodies, on a variety of topics associated with human health and the environment. Major subject areas include: breast cancer, cancer causing phenomena, Chernobyl, ionizing radiation, nuclear technology and its consequences, nuclear power and civil rights, nuclear weapons, radioactivity, uranium, and women and the environment. The series also contains biographical material regarding Dr. Bertell. Published writings appear, for the most parts, in the English language but also in other languages, for instance, Finnish, French and Japanese.

### **Rotary Work, Early Writings, 1976-1994, .66 m. Volumes 7 to 9.**

Series consists of writings, scientific research notes, poems, correspondence, reports, and printed matter relating to Dr. Bertell's research and activities, including the preparation of a film on nuclear hazards, ionizing radiation, nuclear weapons, Chernobyl and her work in the Ukraine.

### **Case Files, 1979-1999, 7.83 m. Volumes 10 to 42, 129, 132, 133, 137, 139, 140, 144-150. Electronic records, 1991, 1994, Volumes 133, 137. 413,381 bytes.**

Series consists of the project or legal cases in which Dr. Bertell participated as an expert scientific witness for individuals or groups of people victimized by environmental disasters, in Canada, the United States, India, Ireland, Europe, Malaysia, the Marshall Islands and Scotland. Of particular Canadian interest are the projects associated with Caribou and Inuit, Mississauga First Nation Reserve, Health 2000 (Ontario), Kiggavik Uranium Mine, Ontario Hydro, Scarborough radioactive soil and Wollaston Lake, Saskatchewan. The case files are organized alphabetically by case and not by country. A majority of the documents are written in English but many other languages may be found in the series.

### **Nuclear information used in "No Immediate Danger", ca. 1973-1985, 2.500 m. Volumes 46 to 57.**

Series consists of publicity as well as research files accumulated in the course of the preparation of the book, *No Immediate Danger: Prognosis for a Radioactive Earth*, published in 1985. The research files contain information on nuclear weapons, alternative energy, nuclear reactors, nuclear testing in the Pacific, peace efforts, etc.

### **International Institute of Concern for Public Health, 1981-2000, 9.03 m. Volumes 43 to 45, 57 to 94, 141 to 142. Electronic records, 1990, Volumes 135-136. 174,330 bytes.**

Sous-fonds consists of the records of the International Institute of Concern for Public Health and its predecessor, the Ministry of Concern for Public Health. The Institute's records consist of organizational records, correspondence, and material relating to the publication of *International Perspectives in Public Health*. The organizational records

consist of minutes of the board of directors, by-laws, financial records, letters patent, budgets and contracts, volumes 57 to 59. The correspondence series, volumes 59 to 94, was organized by the Institute into the following categories: individuals, international; organizations, international; correspondence by country; organizations, American; individuals, Canadian; organizations, Canadian; and correspondence, by province. The publications series, volumes 43 to 45, 135-136, consists of textual and electronic records such as correspondence, manuscript articles, editorials and issues of the publication, *International Perspectives in Public Health*, as well as newsletters and a brochure for "Health 2000".

**General Research, ca. 1980-2001, 6.39 m. Volumes 95 to 122, 140, 142-143.**

**Microfiche, 1967, 2 fiches. Electronic records, 1990. Volume 134. 53,385 bytes.**

Series consists mostly of textual records on various topics associated with environmental hazards, cancer, energy, peace and human rights and are organized by general topic, by author and by subject. There are also electronic records consisting of a text file and seven graph files produced by the Umweltinstitut in Munich in 1990 on radioactivity in Germany as a result of the Chernobyl accident in 1986. A microfiched article, 1967, on human malignancy is also found with "Nuclear articles", volume 116.

**International Commission of Health Professionals for Health and Human Rights, ca. 1985-1994, 0.660 m. Volumes 123 to 125.**

Series consists of correspondence and memoranda with the International Commission of Health Professionals for Health and Human Rights/Comision internacional de los profesionales de la salud para la Salud y lost Derechos humanos (CINPROS), an organization of professionals based in Geneva whose purpose was to halt the use of chemicals and biological weapons against civilian populations and other oppression. Dr. Bertell was a founding member of the organization in 1985. The series also contains printed matter pertaining to human rights issues in many countries including Canada.

**Travel and speaking engagements, 1978-1999, 0.71 m. Volumes 126 to 128 and 143.**

Series consists of correspondence, speech notes, itineraries, and other material relating to Dr. Bertell's speaking engagements in various parts of the world.

**Right Livelihood Award and other awards, 1986-1994, 0.220 m. Volume 129-130.**

Series consists of acceptance speech, correspondence, press coverage and awards, given to Dr. Bertell in recognition of her achievements.

**International and other press clippings, 1977-1990, 0.220 m. Volume 131.**

Series consists of newspaper clippings, transcripts of radio interviews, press releases, itineraries, etc., relating to Dr. Bertell's travelling engagements in various parts of the world, notably Canada, United States, Germany, Australia, England, Ireland, India, New Zealand, Norway, the Pacific Islands, the Philippines, Sweden, Spain and Switzerland.

**Bibliographic Database of the International Institute of Concern for Public Health.**

**Textual files, Volume 130. Electronic records, ca. 1945-1994. Volume 138. 1,845,248 bytes.**

Bibliographic database (virtual volume 138) created by the Institute to accompany its extensive library of books, periodicals, reports, and other printed matter on a wide variety of subjects such as: the aged, atomic energy, ecology, cancer, the Catholic Church, climate, the environment and environmental health, epidemiology, epistemology, feminism, human rights, industrial pollution, international law, medical ethics, military policy, nuclear power, nuclear weapons, nuclear warfare and testing, peace and the peace movement, public health, racial conflict, radiation - ionizing, radiation - low level, radiation - effects, religion, religious orders for women, sociology, solar energy, space warfare, torture, uranium, urban development and planning, World War II, etc.

The database includes a number of fields, such as: title of publication, author, call number, format, date and publisher, and subjects identified as topics in the publication, language of publication, etc.

The publications to which the database refers are not held in the National Archives but have been transferred to the University of Guelph, Ontario.

Originally created by the Institute using CDS-ISIS Micro-Isis software, version 1.0, this file has now been output as a plain ASCII text file which may be searched by keyword using Windows search techniques or it may be searched using information retrieval software. Available for use is the information retrieval software, *Naturel*, Version 4.0, which been used to create an index of the database.

Accompanying the database are several textual files (volume 130) including printouts of records in the database and correspondence concerning the original development of the database using Micro-Isis.

**Atomic Veterans, 1970-1994, 0.18 m. Volume 150.** Series consists of correspondence, reports, newsletters, newspaper clippings, copies of government documents, notes, parliamentary documents, health surveys and other records pertaining to "Atomic Veterans" in Australia, Great Britain, Canada, Japan, New Zealand and the United States of America. There is also material relating to radiation survivors' conferences, radiation experiments in the U.S.A. and radiation victims in general.

**Photographs of visits to various nuclear sites: U.S., Australia, Europe and Canada, 1980-1984**

Series consists of 180 captioned and dated photographs depicting uranium tailings, uranium mines, nuclear power plants, nuclear protests, nuclear bases and nuclear test sites in the United States, Australia, India, France, Switzerland and Canada. The series also contains photographs of "Survival Summer" in the Black Hills of South Dakota, June 1980. These photographs were kept in an album.

**Interviews and other material. 1977-1994.**

Series (80 audio cassettes and 1 audio reel) consists of interviews, talks, speeches, lectures, addresses, songs and public announcements. It includes Dr. Bertell and other speakers such as Ed Needham, Prof. Martin Gardner, Philip Berrigan, etc. The subject matter relates to the environment and public health with particular emphasis on nuclear technology and its effects on the globe. Specific subjects include: nuclear weapons testing, industrial pollution, and human genetic materials. The first 67 audio cassettes are arranged numerically according to receipt and are indexed. Many of the recordings are subject to the provisions of the Copyright Act.

**Nuclear technology and the environment in moving images, 1981-1994.**

Series (48 video recordings) consists mainly of interviews, lectures, press conferences and speeches by Dr. Bertell and others on environmental issues such as nuclear power, children in the nuclear age, science and technology and population, and women and science. The recordings were identified as a unit by Dr. Bertell who prepared a card index to them. Many of the recordings are subject to the provisions of the Copyright Act.

**Canadian and international posters, ca. 1984-1992.**

Series of ephemera consisting of bumper stickers, decals, postcards and posters made in Canada, Germany, Australia, the United States of America and elsewhere depicting a variety of issues related to the work of Dr. Bertell. Among the issues illustrated are: nuclear disarmament, nuclear reactors, nuclear weapons, Chernobyl, environmental pollution, and radiation. Subject to the provisions of the Copyright Act.

**Radiation on the Job, (slides). 1982.**

Item consists of a slide kit of 67 slides created by *The Radiation and Health Labor Project*, Foundation for National Progress (U.S.) and titled "Radiation on the Job: Occupational Hazards of Ionizing Radiation". The slides are accompanied by a written commentary covering the range of jobs where workers are exposed and the known medical effects of radiation exposure. The purpose of the kit is to raise awareness and to promote job safety. Accompanying the slide kit are briefing notes and a brochure titled: "Radiation on the Job". Subject to the provisions of the Copyright Act.

**Nuclear War Graphics Package, (slides). Unknown date.**

Item consists of a group of 75 slides created by the W.N.Y. Peace (Group), in Buffalo, N.Y. They depict various aspects and consequences of nuclear war and make reference to major events in the history of nuclear weaponry, such as the Trinity, the first atomic bomb explosion, 1945. The slides are accompanied by a text which describes the numerically arranged slides. Subject to the provisions of the Copyright Act.

*International Commission of Health Professionals for Health and Human Rights (Geneva)/ CINPROS (Comision internacional de los profesionales de la salud para la Salud y los Derechos humanos). Purpose: to launch a movement to stop the utilization of chemicals and biological weapons against civilian populations and other oppressions such as psychological manipulation, deportation and disinformation of these populations. Dr. Bertell was one of the founding members in 1985. Dissolution following financial difficulties appears to have ensued in 1992.*

Bibliographic database, 1,802 kilobytes,  
created by the Institute and covering the period ca. 1945-1994. It accompanies the Institute's extensive library of books, periodicals, reports, and other printed matter on a wide variety of subjects, such as: the aged, atomic energy, ecology, cancer, the Catholic Church, climate, the environment and environmental health, epidemiology, epistemology, feminism, human rights, industrial pollution, international law, medical ethics, military policy, nuclear power, nuclear weapons, nuclear warfare and testing, peace and the peace movement, public health, racial conflict, radiation - ionizing, radiation - low level, radiation - effects, religion, religious orders for women, sociology, solar energy, space warfare, torture, uranium, urban development and planning, World War II, etc. The database includes a number of fields, such as: title of publication, author, call number, format, date and publisher and subjects identified as topics in the publication, language of publication, etc. The publications to which the database refers are not held in the National Archives but have been transferred to the University of Guelph.

Originally created by the Institute using CDS-ISIS Micro-Isis software, version 1.0, this file has now been output as a plain ASCII text file which may be searched by keyword using Windows search techniques or it may be searched using information retrieval software. Available for use is the information retrieval software, "Naturel" Version 4.0, which has been used to create an index of the database.

Volume 132**

Portion of "press sheets" or page proofs from book by Del Tredici, 1987, with photo of Dr. Bertell and an interview. An accompanying letter from Del Tredici indicates that the interview is a combination of a telephone call and a talk that Dr. Bertell gave in Montreal.

**Case Files: Maps  
Volume 132**

- Four maps of Warren County, Pennsylvania, to accompany the files on Warren County in the Case Files series, volumes 38 to 42. These maps were used in studies of cases of Down's Syndrome, gypsy moth suppression activities and hydro-electric power generation. Created between 1960 and 1989 their dimensions are as follows:  
     2 maps (38 x 51 cm); 1 map (82 x 71 cm); 1 map (103 x 123 cm)
- Three maps depicting views of the world from an environmental perspective.  
   A) *The World: A Developing World*, 1990: one of a series of five maps on the developing world produced with financial assistance from the Canadian International Development Agency. It contains textual information on the developing parts of the world and on environmental hazards as well as a legend

under the following headings: world population growth 1980 to 2000; age structure of the population 1990; infant mortality rate 1990 to 1995; access to safe drinking water 1987; literacy; the sectors of economic activity. 90 x 120 cm

B) *A Developing World*, 1990: two-sided bilingual map with information on the developing parts of the world as well as a legend under the following headings: access to safe water; literacy; population 1987; urbanization; immunization. 90 x 120 cm

C) *New Internationalist World Map on the Peters Projection*, 1983: Scale: 1: 1,230,000,000. "This projection shows countries in proportion to their relative sizes. It is based upon Arno Peters decimal grid which divides the surface of the earth into 100 longitudinal fields of equal width and 100 latitudinal fields of equal height. It treats the rectangles around the equator as squares and buids the other rectangles onto these in proportion to the areas they represent. The zero meridian on this system is combined with a proposed new international date line. This new decimal grid is only indicated, however, on the outer border of the map. The grid marked on the map itself is based on the tradionnnal 18j0 degree division and the present dateline is indicated with a dotted line." 52 x 81 cm. Coloured. Two copies. One has cartographic and textual information on the recto.

### Volume 133

#### **Ontario Hydro**

Electronic document originally titled jointbk.doc and renamed Hydro.lst consists of 338,695 bytes in 132 pages. In tabular format, or four "columns", it consists of a listing of relevant documents to the hearing, but not the actual documents themselves. The documents described by this listing consist of notes, briefs, schedules, submissions, working papers, draft procedures, licences, contracts, minutes of meetings, correspondence and memoranda, manuals, minutes of proceedings, debates in the Senate and in the House of Commons. Dates of documents so described: n.d., 1958 to 1993.

The description of these documents includes references to three documents prepared by Dr. Rosalie Bertell: notes on a side trip to Chernobyl in 1989; a report entitled, "The Aftermath of Chernobyl", 1991; report entitled, "Chernobyl-April 1991", from the Fall 1991 issue of Environmental Health Review.

There are more than 400 references to the AECB (Atomic Energy Control Board) and numerous references to nuclear installations, nuclear hazards, nuclear damage, nuclear incidents, nuclear installations, nuclear stations, etc.

### Volume 137

#### **Bhopal, India**

Electronic document titled "verweij1" consisting of 37,037 bytes and an expanded version titled "verweij3" consisting of 37,649 bytes. This is an article or book chapter entitled, "Medical Services for the Bhopal Gas-Victims". This document accompanies other articles in volume 10 of the Case Files, specifically file number 19. It is not repeated in the textual documents.

## Slides and Photographs

### 1. *Nuclear War Graphics Package:*

180 slides gathered together during the year 1981 by a group of individuals in the United States including MIT's Program in Science, Technology and Society, the Union of Concerned Scientists, the International Physicians for the prevention of Nuclear War, etc.

The slides are accompanied by a detailed textual description and the slides are numbered for ease of reference. The description is 21 pages in extent, in two copies, and there is also a commentary, "Consequences of Nuclear War Graphics Package Slide Descriptions".

### 2. *Radiation on the Job:*

67 slides prepared by the Radiation and Health Labor Project of the *Foundation for National Progress*, San Francisco, 1981, accompanied by a written commentary which relates to: the range of jobs where workers are exposed to radiation, the known medical effects of radiation exposure, what can be done by workers on the job to reduce exposure, and finally the issues that cannot be dealt with by individual workers alone but rather by their unions, 61 pages plus a pamphlet.

### 3. *Photograph album:*

180 photographs, (175 c; 5 b&w). Captioned. Relate to activities of Dr. Bertell around the world to identify nuclear sites and their hazards to human health. The photographs were taken in the years 1980-1982, 1984. They include photographs taken in the Black Hills of South Dakota (anti-nuclear protests), 1980; in Australia, 1980 (uranium mines and tailings); India, 1980 (Tromblay Nuclear Power Plant); New Mexico (uranium tailings); Cattenon, France, 1981 (largest nuclear power installation in the world); Basle, Switzerland, 1981 (nuclear information centre blown by by the Swiss and demonstration at Basle); Portsmouth Air Base, 1982 (nuclear peace rally); Peace Rally, New York City, 1982; Monticello Nuclear Power Plant, Minnesota, 1982; Ground Zero, Bremerton, Washington (Trident base), 1982; Trojan Nuclear Power Plant, Oregon, 1982; Nevada Test Site, 1982; Denison Mines in Canada (uranium tailings); photo of Dr. Bertell at meeting on Reagan's foreign policy, 1984.
