C.E.L. Porteous Papers, 1883-1912 9 ft.

Charles E.L. Porteous (1848- ) was a Bank of Montreal manager at Lindsay 1879 to 1890 and at Kingston 1890 to 1893. In 1893 James Ross a prominent Montreal businessman asked Porteous to manage the financial affairs of William McKenzie, president of the Toronto Street Railway Company. Shortly after this an agreement was made between Ross, McKenzie and Porteous whereby the latter for an annual salary agreed to manage the financial affairs of both McKenzie and Ross. Once the agreement was made Porteous left the Bank of Montreal and moved to Montreal where he made his home though at least half of his time was spent in Toronto. Porteous now became a director and shareholder in several industrial companies and mining enterprises his role often being that of a dummy director acting as a puppet for Ross and McKenzie. In 1900 Porteous became president of the Chambly Manufacturing Company which produced electric power for local industry. Within a short time this company was re-capitalized and reorganized under the name of the Montreal and St. Lawrence Light and Power Company with Porteous remaining as president. This company was then turned over by James Ross to Herbert Holt for stock in the newly formed Montreal Light Heat and Power Company. In 1902 Porteous became President of the Laurie Engine Company in the hope of establishing firmly an old Montreal industry in which several of his friends had invested heavily. This company, however, received considerable competition in the manufacture of high grade engines from plants newly erected and having much better production facilities. Hence by the end of 1905 the Laurie Engine Company was insolvent and had to be re-financed at a considerable loss to its former bondholders.

The Porteous Papers were presented to the Public Archives in 1958 by Mr. Porteous through the McCord Museum in Montreal. This is a rich collection affording the reader glimpses into the Canadian financial world at the turn of the Century.

A large segment of the material pertains to mining development in British Columbia. In the middle nineties the Rossland district in B.C. became famous as an area possessing large and permanent ore bodies. Porteous, acting for Ross and McKenzie, arranged to send agents to B.C. to look over the Rossland district and grab hold of "a few good sure things." These agents took options on several properties, companies were formed and mining speculation was promoted.

Much of the material also pertains to Porteous' business and financial affairs. He invested in a wide variety of industrial enterprises and public utilities and served as a director of several companies.
