

**Introduction to the Finding Aid**  
**Department of Veterans' Affairs**  
**Acc: 1974-258**

## **I. Description**

This accession consists of 581 glass lantern slides depicting soldiers' rehabilitation within the Department of Veterans' Affairs.

Until 1915 the Department of Militia and Defense took responsibility for matters relating to Canadian veterans. An autonomous Military Hospitals Commission, (M.H.C.) formed in 1915, was "to deal with the provision of hospital accommodation and convalescent homes in Canada." Renamed the Invalided Soldiers Commission (I.S.C.) in 21 February 1918, this was absorbed into the new Department of Soldiers' Civil Re-Establishment proclaimed on 24 May 1918.

These photographs cover the years 1918-1925.

## **II. Content**

The finding aid consists of 4 series:

**A.** The Original Item Number (O.I.N.) series reflects the item numbers assigned to the slides by the Department of Veterans Affairs. These number appear on the individual slides. The National Archives has maintained this original order. The arrangement of these 134 slides reflects this.

Example: O.I.N. 11    M.C.H. Moose Jaw. Ross Park.

The number "11" appears on the slide, as does the title: "M.C.H. Moose Jaw. Ross Park."

**B.** The I.S.C., M.H.C. and S.C.R. series have been assigned numbers by the National Archives. The series name and number appear on the envelope containing the slide.

Example: I.S.C. 25    Esquimalt. Dressed Poultry

The "I.S.C. 25" number was assigned by the National Archives when we received the accession from Veterans' Affairs. "Esquimalt. Dressed Poultry" is the title assigned to the slide by the Department of Veterans' Affairs.

## **III. DUPLICATES**

Often a slide is a duplicate of the slide that preceded it. This is indicated by a “-1.”

Example: I.S.C.136 I.S.C. One-legged Airman  
I.S.C. 136-1 I.S.C. One-legged Airman

Occasionally these duplicate titles are not the same, but if a number is followed by a “-1” then the images are identical.

There are other duplicate images that appear throughout the collection. Often these images have different titles. The archivist has indicated wherever a match is located.

Example: O.I.N. 16 M.H.C. Qualicum Beach [duplicate M.H.C. 33]  
M.H.C. 33 M.H.C. Qualicum Beach [duplicate O.I.N. 16]

#### **IV. COLLECTION BREAKDOWN**

The assigned I.S.C. and M.H.C. series both have provincial and French breakdowns of their slides. Thus, if a researcher is looking for slides from a specific province, or from France, they can start their search in the appropriate area of the finding aid. Researchers should be cautioned that these provincial breakdowns are not comprehensive, and for a complete list of all the slides pertaining to a province, he or she should read through the entire finding aid.

#### **V. National Archives Copy Negative Numbers**

Any slides that have been copied from Accession 1974-258 as of **February 2003** have been indicated by their copy negative number. To order a copy of the image, simply cite the “PA” number.

If ordering an image that does not appear to have been copied, researchers are encouraged to first check the online database to ensure that a copy negative does not already exist.

Amy Tector  
February, 2003
