

FINDING AID: 108-57

RECORD GROUP: RG 108 - Environment Canada

SERIES: Environmental Protection Service - Central Registry Files

ACCESSION/BOX: 1992-93/253 - boxes 1-35

DESCRIPTION: The finding aid is an unverified file list produced by Environment Canada indicating box number, file number and outside dates. Also included is a file list of all subject files used by the Environmental Protection Service of Environment Canada.

INSTRUCTIONS: By necessity, there are two parts to this finding aid. In 1985 the EPS merged with the Environmental Conservation Service to form the Conservation and Protection Service (CPS) and a new file classification system was subsequently developed to reflect this amalgamation. In the case of this particular accession, these EPS files were stripped from their old file jackets, prior to integration into a new CPS file classification system. Unfortunately, this conversion never took place and records management personnel at Environment Canada were forced to recreate the former EPS file classification system by grouping all records pertaining to the same primary under a general file number. All secondary and tertiary file classification numbers and much of the documentation on file were lost as a result of this exercise.

Part I of this finding aid, then, consists of a file list of all subject files used by the EPS and a list of all secondary and tertiary file numbers that have been amalgamated into a surviving primary file classification number. Part II is comprised of a box list, providing file and part numbers, and inclusive date ranges.

Researchers should consult part I of the finding aid to determine the appropriate primary file classification number, and then use Part II of the finding aid to locate the proper accession box number:

The following information is required to order a box:

RG No.:
Accession No.:
Box No.:
File No.:

DATE:

August 1993
