| 1834 | R112 | RG24 | 2021-00207-1 | 112 | 7690-DLCU001-F05119 | | BAR-4, Nicholson Peninsula, NWT Site Remediation Phase One: Delineation | File consists of two reports on site remediation at BAR-4 prepared by Environmental Sciences Group of Royal Military College. The first report includes: 20 pages of PIN-M barrel samples analysis; background information on BAR-4; site delineation program; and summary of delineation of contaminated soil areas, stained areas, and hydrocarbon-contaminated areas; samples of PCBs in concrete and paint, insulation material water, landfill and leachate; site maps; tables of data information; and site photographs. Appendices include: methods of delineation, data sets for the site, and quality assurance and control summary. The second report includes: environmental reports on BAR-4, NWS environmental study, Site Remediation Phase One: Delineation, Remediation Phase Two: Confirmatory Sampling, DND report on Hydrocarbon Contaminated soil; proposed landfill monitoring plan; copy of cooperation agreement between the IRC and the DND for DLCU project within the Inuvialuit Settlement Region; and Treasury Board Real Property Environment Policy. Report also includes copies of regulations on: chlorobiphenyls, storage of PCB material, and the transportation of Dangers Goods Acts, 1992. | Locations mentioned in the file include: BAR-4 NICHOLSON PENINSULA - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Treasury Board of Canada. | 1998/03/01-2000/01/31 |

| 1954 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05353 | | DLCBAR1 - MON | File pertains to post-construction monitoring at DEW Line sites in the Inuvialuit Settlement Region (ISR), especially at BAR-1. The file contains a Post-Construction Fuel Spill Monitoring Plan for BAR-1, together with associated correspondence and data regarding the amount of free product discovered in monitoring wells at several dates during the BAR-1 remediation in 1999 and 2000. The file also contains the minutes of a 15 January 2002 Environmental Working Group (EWG) teleconference which discussed this fuel-spill monitoring plan as well as the landfill monitoring plan for ISR Dew Line sites. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; IEG Environmental Consultants Limited; Inuvialuit Land Administration; Parks Canada; Sorel Environmental Sciences; UMA Engineering. | 2000/01/01-2003/12/10 |
| 1955 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05354 | | DLCBAR1 - IRC | File contains documents to or from the Inuvialuit Regional Corporation (IRC) or Inuvialuit Environmental Inc., regarding the DLCU project at BAR-1. The material relates to an IRC request for copies of design drawings and specifications. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Environmental Inc; Inuvialuit Regional Corporation; UMA Engineering. | 1998/07/15-2000/11/03 |
| 1956 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05355 | | DLCBAR1 - GEN | File contains miscellaneous material related to the DLCU project at BAR-1. It contains correspondence regarding a disagreement between the Federal Heritage Buildings Review Office, DND and the Inuvialuit Regional Corporation (IRC) regarding the proposed demolition of buildings, including its implications with regard to agreements between DND, the IRC, and DIAND. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; E Gruben's Transport; Environmental Sciences Group / Royal Military College RMC; Federal Heritage Building Review Office; Inuvialuit Regional Corporation; Parks Canada. | 1999/06/03-2001/01/15 |

| 1959 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05360 | | DLCBAR1 - ENG - 02 | File pertains to the investigation and remediation of hydrocarbon contamination at BAR-1, particularly to work being carried out by engineering consultants in 1999 and 2000. The material relates to: technical methods to be used, findings from site characterization and investigation work in 1999, and plans for remediation work in 2000. Some material discusses whether an ecological risk assessment might be needed. The file contains a wet-signature copy of a 31 March 1999 SEACOR report on BAR-1, titled 'Feasibility Study and General Remedial Options.' | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Land Administration; Inuvialuit Regional Corporation; Parks Canada; SEACOR Environmental; SGE Group; Sorel Environmental Sciences; UMA Engineering; Yukon Territory Water Board. | 1999/04/16- 2000/03/28 |
| 1960 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05366 | | Resolution Island | File contains correspondence with DND concerning abandoned facilities at BAF-5 (Resolution Island), as well as a project synopsis of the clean up of the hazardous material and surplus infrastructure at BAF-5. The file also contains correspondence between DIAND and DND concerning conditions on Resolution Island, and a DIAND-DND memorandum of understanding concerning cleanup of hazardous materials from the abandoned DEW Line sites. Finally, the file contains historical correspondence in regard to DND property locations and reservations of land for the DEW Line. | Locations mentioned in the file include: Other - Non-DEW Line Site. Organizations mentioned in the file include: Department of National Defence; Indian and Northern Affairs Canada. | 1956/01/18- 1990/04/12 |

| 1961 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05370 | | North Warning System - Short Range Radar Stations Zone 3 - Preliminary Environmental Data | File consists of a bound report prepared by Dillon Consulting in October 1987 for the North Warning System, pertaining to the Preliminary Environmental Data of the Short Range Radar Stations (SRRS) located in Zone 3. The report describes the environmental condition of 7 SRRS in zone 3 [Bray Island, Rowley Island, Lailor River, Cape McLoughlin, Keith Bay, Pelly Bay, and Simpson Lake]. For each of the SRRS, the report provides a list of Environmental Observations, Water Quality Assessment, and tables detailing the environmental data of the SRRS. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT; Other - Non-DEW Line Site. Organizations mentioned in the file include: Dillon Consulting; North Warning System Office. | 1987/10/14 |
| 1962 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05371 | | POL Spill Sampling and Investigation CM-66432 | File consists of a bound report prepared by ATCO Frontec in January 2000 for the North Warning System concerning the sampling and investigation of POL spills at five sites [PIN-3, CAM-2, BAR-E, BAF-5, and LAB-3]. The report provides the results of the sampling and investigation activities which took place during the summer of 1999. It also summarizes the extent of the impact of the spills and offers recommendations for the five sites. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; Other - Non-DEW Line Site. Organizations mentioned in the file include: ATCO Frontec Corporation; North Warning System Office. | 2000/01/05- 2000/01/04 |
| 1963 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05372 | | POL Spill Sampling and Investigation CM-66615 | File consists of a bound report prepared by ATCO Frontec in December 2000 concerning the sampling and investigation of POL spills at CAM-2 and BAR-E. The report provides the field data of the sampling and investigation activities which took place during the summer of 2000, as well as technical drawings of the two sites. The report concludes that the spills at CAM-2 and BAR-E are to be considered closed as they do not meet prioritization criteria. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; Other - Non-DEW Line Site. Organizations mentioned in the file include: ATCO Frontec Corporation. | 2000/12/07 |
| 1964 | R112 | RG24 | 2021-00207-1 | 121 | 7690-DLCU001-F05373 | | Removal of Contaminants from Distant Early Warning Sites in Canada's Arctic | File consists of a report prepared by Environment Canada in December 1989, which provides a summary of a project by DND, EC and DIAND to remove hazardous materials [PCB and POL] from 21 radar sites in 1985. The sites discussed in the report are BAR-B, BAR-C, BAR-D, BAR-E, PIN-A, PIN-B, PIN-C, PIN-D, PIN-E, CAM-A, CAM-B, CAM-C, CAM-D, CAM-E, CAM-F, FOX-1, FOX-A, FOX-B, FOX-C, FOX-D, FOX-E, and the U.S. Coast Guard site at Padloping Island. The report provides the methods employed for the removal process, as well as the results and subsequent recommendations for each of the 21 sites. | Locations mentioned in the file include: Other - Non-Dew Line Site. Organizations mentioned in the file include: Department of Indian Affairs and Northern Development Canada; Department of National Defence; Environment Canada. | 1989/12/01- 1989/12/31 |

| 1965 | R112 | RG24 | 2021-00207-1 | 122 | 7690-DLCU001-F05375 | | An Environmental Site Investigation at Crocker River, PIN-1BG, NWT | File consists of a draft report prepared by ESG in November 1999, for the North Warning System. The report is a preliminary environmental assessment of the Short Range Radar site PIN-1BG, located at Crocker River. The report provides the results of the environmental assessment and sampling program, and recommends minor remedial action in the future. | Locations mentioned in the file include: Other - Non-Dew Line Site. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; North Warning System Office. | 1999/11/30 |
| 1966 | R112 | RG24 | 2021-00207-1 | 122 | 7690-DLCU001-F05376 | | BAR-B, Stokes Point, Ivvavik National Park, Yukon Territory - Beach Refueling Area - Year 1 Monitoring Report 2011 | File consists of a bound report prepared by ESG in February 2012 for the North Warning System Office. The report provides a summary of the activities and results from the 2011 Year One Monitoring field season at the Beach Refuelling Area (BRA) at the BAR-B site located near Stokes Point. The file also includes a CD associated with the report. | Locations mentioned in the file include: Other - Non-Dew Line Site. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; North Warning System Office. | 2012/02/29 |
| 1967 | R112 | RG24 | 2021-00207-1 | 122 | 7690-DLCU001-F05377 | | Stokes Point Celebration - Aklavik, NT - Jan 25 2011 | File consists of a CD containing photos and video from the 2011 BAR-B remediation celebrations. The photos and video were taken by representatives of Parks Canada. | Locations mentioned in the file include: Other - Non-Dew Line Site. Organizations mentioned in the file include: Parks Canada. | 2011/01/25 |
| 1968 | R112 | RG24 | 2021-00207-1 | 122 | 7690-DLCU001-F05378 | | Phase II Environmental Site Assessments of CAM-1A, Jenny Island, NU - BAF-4A, Loks Land Island, NU - BAF-5 Resolution Island, 2009 - 2009 | File consists of a report prepared by ESG in January 2013. The report provides a summary of the environmental site assessment [ESA] of three Short Range Radar [SRR] sites [CAM-1A, BAF-4A, and BAF-5], which were performed during the 2009 summer season. For each of the three sites, the report includes a summary of the site's investigation program, results of the sampling conducted during the summer season, and descriptions of the contaminated soil and landfill areas. The report additionally contains technical drawings and photographs detailing the sampling program and environmental assessment of each SRR site. | Locations mentioned in the file include: Other - Non-Dew Line Site. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC. | 2013/01/31- 2013/01/31 |

The file contains a BAR-1 contaminant recovery and remediation final report which outlines all remediation and recovery efforts, along with all well recovery data. The report includes field logs, maps and technical drawings, graphs, and well recovery data. The file also contains fuel inventory records; site visit reports to inspect the fuel system at BAR-1 for a possible leak; a containment and surface remediation plan; a revised containment and surface remediation plan; a final report summarizing action taken and completed in effecting emergency repairs in response to a monthly fuel inventory discrepancy; spill reports; Environment Canada pollution incident reports; site diagrams; POL system plans; and an environmental inspection of active DEW Line stations in the Yukon. Also found in the file is correspondence regarding the fuel spill cleanup program at BAR-1; the spill origin, response, and remedial action; a re-vegetation program; results of a spill site investigation; and environmental concerns. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. The summary was conducted by Inuvialuit Environmental Inc and is project number 677-00. The assessment was conducted to quantify potential ecological and human health risk associated with hydrocarbon contamination found underneath and adjacent to the Station Pad at Bar-1. The assessment report includes: study objectives and methodology; site description and environmental setting; receptor characterization; exposure assessment; hazard assessment; risk characterization; sensitivity and uncertainty analysis; and conclusions and recommendations. Assessment also includes a site location map, a conceptual model, area location map, data tables, result summaries, and graphs. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Inuvialuit Environmental Inc; Inuvialuit Settlement Region Review Committee; Parks Canada; Sorel Environmental Sciences. | 2000/08/18- 2000/08/31 |

Annex includes a site description; a project description including site features, construction facilities, site access, and schedule; an existing environment description which includes information on climate, biophysical resources, geology, landforms, soil, water resources, vegetation, wildlife, fish, socio-economic setting, land use, and heritage resources; project impacts and mitigative measures including potential impacts, biophysical resources, socio-economics, heritage resources, trade-offs and alternatives, residual effects, and monitoring programs. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Department of Indian Affairs and Northern Development Canada. | 1988/12/01-1988/12/31 |
| 2071 | R112 | RG24 | 2021-00207-1 | 127 | 7690-DLCU001-F05580 | | Work Methodology Plan for the Clean Up of the BAR-1 Komakuk Beach DEW Line Site - Final Version | File consists of a final version of the work methodology plan for the clean-up at BAR-1. Plan outlines: the demolition program including preparation and management of PCB contaminated painted materials and non-hazardous building materials; contaminated soil excavation, storage, and disposal; landfill waste excavation; hazardous materials management, storage, and disposal; the asbestos abatement program; off-site transport of waste material; and fuel spill remediation. Plan also includes emergency response procedures; an asbestos training program outline; a bear monitoring program; a fuel spill remediation site safety plan; process and instrumentation drawings and manufacturers documentation. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; E Gruben's Transport; Inuvialuit Environmental Inc; Inuvialuit Projects Inc. | 1995/08/31-1999/08/05 |

| 2072 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05581 | | DLCU Project: BAR-1 Fuel Spill Remediation | File contains: a draft 2000 work plan recommendation and specifications, a letter from SEACOR to Sorel regarding recommendations for the operation of the excavation system, and a final draft report of the site characterization and free product recovery at the BAR-1 site. The report outlines: the drilling and soil sampling program, the groundwater monitoring and sampling program, laboratory analytical chemistry results, the free product recovery system design and build, the free product recovery program, and data synthesis. The report also includes screening results, analytical results, site plans and maps, site photographs, and technical drawings. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: SEACOR Environmental; Sorel Environmental Sciences; UMA Engineering. | 2000/01/20- 2000/01/24 |
| 2073 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05583 | | BAR-1, Komakuk Beach, Yukon Territory - Site Remediation - Phase One: Delineation | File consists of a site remediation report on phase one delineation work at BAR-1. Report provides an overview of a 1997/98 site investigation to determine the volumes, concentration, and location of contaminated soil at BAR-1 in order to finalize cleanup plans. The report includes: a section on the delineation program which includes a site overview, a summary of samples collected, an overview of contaminated soil locations, and site photographs and maps; a section summarizing the results of the program and providing recommendations for contaminated soil areas, landfills, water, and structural materials; and appendices outlining methods, data, and quality assurance/quality control. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC. | 1998/12/01- 1998/12/31 |

| 2075 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05588 | | DLC BAR1 ENV - Cont. Number 4912 A-Jetty Structural Upgrade | File contains two bound reports concerning environmental screening clean-up work completed at the BAR-1 site. One of the reports is a submission to the environmental impact screening committee prepared by DCC for DND. Included in this report are: a project summary, anticipated environmental impacts, clean-up/reclamation plan, monitoring plans, community consultation particulars, Federal/Territorial regulatory overviews, location maps, specific clean-up summary of BAR-1, and copies of: the DND/IRC Cooperation Agreement, DND/Parks Canada MOU, DLCU general protocols, DLCU barrel protocols, the spill response plan, the Environmental Protection Plan, and a DLCU permit summary. The second report is an environmental screening report prepared by DCC for DND. Included in this report are: a project description, assessment details, regulatory overview, environmental guidelines, an impact analysis, site plans and maps, and copies of: DND/IRC Cooperation Agreement, DND/Parks Canada MOU, DLCU general protocols, and an excerpt from the Ivvavik National Part Management Plan (1995), and an excerpt from the DLCU Archaeological Survey (1991). | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; SGE Group; UMA Engineering. | 1999/03/31 |

| 2076 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05589 | | DLCBAR-1 ENV | File contains 3 bound reports related to the clean -up at the BAR-1 site. The first report is specifications for the Clean-up of the BAR-1 site prepared for DND (March 1999). Included in this report are: schedule of unit prices, cost allowances, general project instructions, project control plans, mobilization plans, safety requirements, and environmental protection plan, demolition protocols, fuel spill remediation, contaminated soils, hazardous waste material removal, landfill waste excavation, demolition inventory, asbestos abatement, PCB paint results, PCB disposal requirements, a geotechnical report, and site photographs. The second report is a draft site characterization and free product recovery for hydrocarbon spill at BAR-1 (November 1999) from SEACOR to UMA, that includes many hand-written marginalia notes. Included in this report are: particulars of the drilling and sampling program, the groundwater monitoring program, results from laboratory and chemical results, details on the free product recovery system design, site maps/plans, methodology work-plans, bore-hole logs, analytical chemistry reports, and site photographs. The third report is specifications for the clean-up of the BAR-1 site that is part of the environmental protection plan prepared for DND (March 1999). This environmental protection plan consists of: a project description overview, regulatory overview, general environmental protection levels, environmental inspection measures, and contingency plans. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; SEACOR Environmental; SGE Group; UMA Engineering. | 1999/03/01-1999/11/12 |
| 2077 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05596 | | 05 - DLB3 - ENV - Environmental Screening Report for the Cleanup of Two Landfills in the Hamlet of Tuktoyaktuk, NWT | File contains an Environmental Screening Report for the Clean Up of Two Landfills in the Hamlet of Tuktoyaktuk, NWT. The report contains overview, guidelines conditions and analysis of the environmental assessment. Included are figures of locations and site plans, tables on scope, animal and environmental impact and monitoring information. Annexed is a cooperation agreement between the IRC and DND on clean up of DEW sites. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Inuvialuit Regional Corporation. | 1999/01/01 |
| 2078 | R112 | RG24 | 2021-00207-1 | 128 | 7690-DLCU001-F05598 | 1 | Cleanup of Tuk Landfills A&D and Sariktok Tank Farm Demo Volume 1 of 2 | File is a bound group of 4x6 colour photos displaying clean up of the Saviktok Tank Farm. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other. | 1999/07/17-1999/08/18 |

| 2084 | R112 | RG24 | 2021-00207-1 | 129 | 7690-DLCU001-F05609 | | Specifications for the Cleanup of Komakuk Beach, YT - DEW Line Site | File consists of a draft/revised report prepared by UMA Engineering Ltd. and SGE Group Inc. for DND with specifications for the cleanup of BAR-1. Specifications are for cost summaries, general instructions, mobilization and demobilization, shop drawings/data/samples, project photographs, testing laboratory services, safety requirements, environmental protection, camp constructions, rental vehicles, materials and equipment, recording documents, demolition, spill remediation, contaminated soils, asbestos abatement, hazardous waste material, transportation of waste materials, grading, debris removal, aggregates, landfill waste excavation, maximum dry density and instrumentation. Appendices include: demolition and asbestos inventories, PCB paint results, disposal requirements, a geotechnical report, site photographs, site use restrictions, an environmental protection plan, and a copy of the Parks Canada/DND MOU. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Parks Canada; SGE Group; UMA Engineering. | 1999/03/31 |
| 2085 | R112 | RG24 | 2021-00207-1 | 129 | 7690-DLCU001-F05610 | | 03 Landfill Monitoring Final Report - BAR-1 | File consist of a final Landfill Monitoring Report for BAR-1 prepared by IEG Environmental for DCC. The report is a collection of post-construction monitoring data results from visual inspection, soil sampling, groundwater sampling, depth soil sampling, and thermal monitoring. It includes background, methodology, QA/QC, site plans/figures of the results, photographs, analytical lab results and field notes. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; IEG Environmental Consultants Limited. | 2004/01/31 |
| 2086 | R112 | RG24 | 2021-00207-1 | 129 | 7690-DLCU001-F05614 | | Site Remediation Phase Two: Confirmatory Sampling - 1999 | File consists of a site investigation report by the Environmental Sciences Group on monitoring the success of the soil remediation conducted at BAR-1 in 1999 through the delineation of contaminated areas, confirmatory sampling, analysis of soil excavation, and assistance in the movement of soil and water samples from the fuel spill remediation to Kingston. The report also includes site photographs and maps. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Regional Corporation; Parks Canada; UMA Engineering. | 1999/12/31 |

| 2093 | R112 | RG24 | 2021-00207-1 | 129 | 7690-DLCU001-F05621 | | BAR-1 Fuel Spill Remediation - PIN-3 Investigation | File consists of documents pertaining to BAR-1 fuel spill remediation. This includes: a draft Change Request from UMA Engineering Ltd. to DCC for the enhancements to the program; summary information from UMA to DCC; CCME Ecological Risk Assessment from DCC; transitory emails; Reports of Meetings on 17 Feb 2000, 10 Dec 1999, 27 Jan 2000, and 23 Nov 1999 with Meeting Agendas and notes; a draft 2000 Work Plan with recommendations and specifications prepared by SEACOR Environmental Engineering for UMA; a brief report from the Environmental Sciences Group describing the investigation conducted at PIN-3 during Jan 2000; a memorandum from SEACOR with operational recommendations; recommendations from SOREL Environmental Sciences for operation of Multi-phase Extraction System; a cost breakdown schedule; and a table with soil analytical chemistry results. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Parks Canada; SEACOR Environmental; Sorel Environmental Sciences; UMA Engineering. | 1999/12/06-2000/04/04 |
| 2094 | R112 | RG24 | 2021-00207-1 | 130 | 7690-DLCU001-F05627 | | Saviktok Point - ESG-771 - Archive 02-160 - ID# 5267 | ESG file pertaining to testing of soil from the Saviktok Point tank farm, near BAR-3, and to plans for remediation of hydrocarbon contamination at the tank farm. The file contains testing data for a number of soil samples, along with site plans showing the sampling locations. It also contains material on potential remediation methodologies, and a copy of the remediation Statement of Work with handwritten marginal comments by ESG. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 1998/08/31-1999/05/21 |
| 2095 | R112 | RG24 | 2021-00207-1 | 130 | 7690-DLCU001-F05629 | | Saviktok Point - ESG-809 - Archive 02-160 - ID# 5266 | ESG file containing various material related to planning for the remediation of hydrocarbon contamination at Saviktok Point, near BAR-3. The material deals with the setting of environmental standards for the project, the selection of cleanup methodologies, and the adoption of a contracting strategy. It also contains information on sampling and demolition to be carried out. Finally, it contains what appear to be reproductions of three black-and-white aerial vertical photographs of Tuktoyaktuk, from 1970 (A21629.159), 1974 (A 23850-60), and 1980 (A25591), respectively. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; Incorporated Hamlet of Tuktoyaktuk; Inuvialuit Land Administration; SGE Group; UMA Engineering. | 1970/01/01-1999/02/24 |

| 2097 | R112 | RG24 | 2021-00207-1 | 130 | 7690-DLCU001-F05635 | | T-hang - Tuktoyaktuk Hangar - Liaison with GNWT arctic airports - ESG-780 - ID# 6481 - 02-120 | ESG file pertaining to an environmental investigation of the Tuktoyaktuk municipal landfill, near BAR-3, and to the disposition of the US Air Force (USAF) hangar at the Tuktoyaktuk Airport. The file deals with the process by which ESG received the job of investigating for contamination at the Tuktoyaktuk municipal landfill, which DND and various private companies had used, and it contains material on methods to be used in the study, including information on bore holes and monitoring wells at the landfill. Testing data from sediment samples in 1992 is also included. The file also discusses plans for the demolition of the USAF hangar at the Tuktoyaktuk Airport, and for possible remediation and subsequent use of the hangar site. Although the file pertains mainly to BAR-3, it contains a few minor references to plans for other DEW Line sites. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Indian Affairs and Northern Development Canada; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Government of the Northwest Territories; Incorporated Hamlet of Tuktoyaktuk; UMA Engineering. | 1992/11/06-1996/06/03 |
| 2098 | R112 | RG24 | 2021-00207-1 | 130 | 7690-DLCU001-F05636 | | Saviktok Point - Hydrocarbon Bioremediation of the Former Tank Farm Pad - QA/QC Report - ESG-765 | Bound report on soil sampling and testing carried out by ESG in 2000 to provide quality assurance/quality control regarding the remediation, sampling, and testing performed by Biogenie SRDC during the cleanup of hydrocarbon contamination at the Saviktok Point tank farm, near BAR-3. The report discusses the methods used, presents testing data, and analyzes discrepancies. It includes site maps and colour copies of photos. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. The substantive matters dealt with include procedural and methodological issues, baseline sampling data, the development of the project charter, employment of Inuvialuit workers, community meetings, and various other issues. The file contains a site close down report for the 2000 working season, material from a partnering workshop, and a performance bond and insurance documentation submitted by the contractor. Finally, the file also contains a site close down report for some emergency remediation carried out in 2000 at PIN-3 to deal with PCB-contaminated ash from a recent building fire. A label reading 'NTI Vs. AGC (DCC)' is stapled to the file cover. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: Andrew Johnson Associates; Biogenie SRDC Incorporated Sainte-Foy; Defence Construction Canada Ltd Other; E Gruben's Transport; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Land Administration; UMA Engineering. | 2000/04/12-2001/07/04 |

| 2111 | R112 | RG24 | 2021-00207-1 | 131 | 7690-DLCU001-F05707 | | DLCBAR-3 - LIT | File contains correspondence and associated material regarding the scope of DND's or DCC's possible legal responsibilities to clean up landfill debris in Tuktoyaktuk outside of DND property, the landfill in question possibly being associated with BAR-3. Most of the file relates to a portion of the landfill extending into the residential property of James Lay and Maureen Gruben. The file also contains copies of excerpts from an Environmental Disclosure Report for BAR-3 and from an Environmental Assessment regarding the cleanup of Landfills A and D in the Hamlet of Tuktoyaktuk, near BAR-3. A few documents in the file also make brief reference to other DEW Line sites about which DLCU officials were in discussion with other federal departments about issues requiring resolution, such as possible hydrocarbon contamination at FOX-M. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; CAM-2 GLADMAN POINT-NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Justice Canada; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Public Works and Government Services Canada; UMA Engineering. | 1999/05/03-2003/04/24 |
| 2112 | R112 | RG24 | 2021-00207-1 | 131 | 7690-DLCU001-F05708 | | DLBAR3 - 01 | File pertains to the cleanup of BAR-3 in 1996. The file contains the Inuvialuit Benefits Plan of the cleanup contractor, the minutes of a meeting between contractors, DCC, and UMA, and a small amount of correspondence. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: AXA Pacific Insurance Company; Defence Construction Canada Ltd Other; Department of National Defence; E Gruben's Transport; Government of the Northwest Territories; Inuvialuit Projects Inc; SGE Group; UMA Engineering. | 1996/04/17-1996/09/18 |

| 2114 | R112 | RG24 | 2021-00207-1 | 131 | 7690-DLCU001-F05711 | | DLB3 - REV | File contains material related to the implementation of the Inuvialuit Regional Corporation (IRC)-DND Cooperation Agreement, particularly with respect to the DLCU project at BAR-3. Much of the file pertains to the first meeting of the IRC/DND Review Committee, held on 28 August 1996 in Tuktoyaktuk, including substantive preparatory material, draft minutes, and final minutes. The file also contains correspondence and other records related to the contracting/tendering processes to be adopted, participation of Inuvialuit contractors and employees, and environmental standards to be used with regard to hydrocarbon and PCB contamination. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; E Gruben's Transport; Environmental Sciences Group / Royal Military College RMC; Incorporated Hamlet of Tuktoyaktuk; Inuvialuit Development Corporation; Inuvialuit Land Administration; Inuvialuit Projects Inc; Inuvialuit Regional Corporation. | 1996/06/13- 1999/05/25 |
| 2115 | R112 | RG24 | 2021-00207-1 | 131 | 7690-DLCU001-F05713 | | DLB3 - PCB | File pertains to attempts to deal with PCB contamination during the DLCU project, primarily at BAR-3. Much of the file pertains to the creation, use, and decommissioning of a PCB storage area at BAR-3 in 1996 and 1997, and the possible re-establishment of a PCB storage area in 1999. Included are records on the storage and transportation of PCB-contaminated material, including storage at PIN-M. The file also contains material on methods to be used for dealing with PCB contamination, photocopied excerpts from environmental assessments of landfills at Tuktoyaktuk, correspondence with Environment Canada and Department of Fisheries and Oceans regarding PCB issues, and a 1992 copy of the Storage of PCB Material Regulations under the Canadian Environmental Protection Act. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Aklavik Hunters and Trappers Committee; Defence Construction Canada Ltd Other; Department of Fisheries and Oceans Canada; Department of Indian Affairs and Northern Development Canada; Department of National Defence; E Gruben's Transport; Environment Canada; Environmental Impact Screening Committee; Environmental Sciences Group / Royal Military College RMC; Incorporated Hamlet of Tuktoyaktuk; Northern Transportation Company; Royal Canadian Mounted Police; UMA Engineering. | 1996/04/03- 1999/08/04 |

| 2116 | R112 | RG24 | 2021-00207-1 | 131 | 7690-DLCU001-F05718 | | DLB3 - ENV - 01: DEW Line - BAR-3 - Environmental Assessment and Protection | File contains a variety of material related to environmental requirements for carrying out DLCU work at BAR-3. Among other things, the material relates to obtaining permission for clean-up work from the Environmental Impact Screening Committee, making potential updates to the Environmental Protection Plan, and obtaining permission from the Department of Fisheries and Oceans and Environment Canada for landfill cleanup and the creation of a PCB storage area. In addition to correspondence, the file contains such documents as a contingency plan for a PCB storage area at BAR-3, an appreciation about planning for the cleanup of Landfills A and D and Saviktok Point, a large document titled 'Project Description for the Clean Up of Two Landfills within the Tuktoyaktuk Municipal Boundary,' and BAR-3 soil testing data of an unclear date. While the file mainly pertains to BAR-3, it contains a limited amount of material pertaining to other sites, including copies of technical drawings for a proposed landfill at PIN-M. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Fisheries and Oceans Canada; Department of National Defence; Environment Canada; Environmental Impact Screening Committee; Environmental Sciences Group / Royal Military College RMC; Incorporated Hamlet of Tuktoyaktuk; Inuvialuit Regional Corporation; North Warning System Office; Northern Transportation Company; Tuktoyaktuk Hunters and Trappers Committee; UMA Engineering. | 1996/01/15- 1998/08/19 |

The file contains a lengthy report-like document identified as a 'pre-report summary' on this work. It also contains many memos, maps, data tables, lab documents, and so forth recording the work done during late summer and early fall and providing analytical results for confirmatory and delineation samples. One document provides notes from the discussion at an Environmental Working Group meeting (EWG). Although the file pertains mainly to BAR-2, it also contains a small amount of material on remediation of hydrocarbon contamination at Saviktok Point, near BAR-3. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT. Organizations mentioned in the file include: ATCO Frontec Corporation; Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Environmental Working Group Material; Inuvialuit Land Administration; North Warning System Office; Public Works and Government Services Canada; SEACOR Environmental; Sorel Environmental Sciences; UMA Engineering. | 2000/07/30-2000/12/04 |
| 2155 | R112 | RG24 | 2021-00207-1 | 134 | 7690-DLCU001-F05795 | | BAR-2 2000 - ESG-636 - Archive 02-158 - ID# 5241 | ESG file containing a variety of material relating to DLCU work at BAR-2 in 2000. A significant amount of the documentation pertains to the investigation of hydrocarbon contamination near the garage. Included in this latter material are records pertaining to the Environmental Working Group, and documents discussing whether the North Warning System Office had any responsibility to deal with the matter. Other issues discussed in the file include water use at BAR-2, the design of the US Air Force landfill at BAR-2, a 14 June 2000 partnering workshop in Inuvik, and the Clean Up Implementation Plan for the site. Although most of the file pertains to BAR-2, it also contains an ESG report from BAR-4 for the week ending 23 July 2000. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-4 NICHOLSON PENINSULA - NWT. Organizations mentioned in the file include: Andrew Johnson Associates; ATCO Frontec Corporation; Defence Construction Canada Ltd Other; Department of National Defence; E Gruben's Transport; Environmental Sciences Group / Royal Military College RMC; Environmental Working Group Material; Inuvialuit Projects Inc; Inuvialuit Regional Corporation; North Warning System Office; SEACOR Environmental; Sorel Environmental Sciences; UMA Engineering; Yukon Government; Yukon Territory Water Board. | 2000/04/03-2000/12/04 |

| 2156 | R112 | RG24 | 2021-00207-1 | 134 | 7690-DLCU001-F05796 | | BAR-2 1999 - ESG-637 - Archive 02-158 - ID# 5242 | ESG file containing a variety of material pertaining to DLCU work at BAR-2, primarily during the 1999 season. The file includes many Total Petroleum Hydrocarbon chromatograms, as well as other analytical data for soil, water, or paint samples from BAR-2. Among other things, the file also contains material related to a public meeting in Aklavik on 8 December 1999, letters from DCC to other federal agencies about an environmental screening being conducted for the cleanup project at BAR-2, and material discussing hydrocarbon contamination near the garage. Although the file pertains mainly to BAR-2, notes from the public meeting deal with matters related to BAR-1 and BAR-4 as well. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-4 NICHOLSON PENINSULA - NWT. Organizations mentioned in the file include: Aklavik Hunters and Trappers Committee; Defence Construction Canada Ltd Other; Department of Fisheries and Oceans Canada; Department of Indian Affairs and Northern Development Canada; Environment Canada; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Regional Corporation; North Warning System Office; Sorel Environmental Sciences; UMA Engineering. | 1999/07/13-2000/02/29 |
| 2157 | R112 | RG24 | 2021-00207-1 | 134 | 7690-DLCU001-F05813 | | DLB3 - DATA - 9036 | File pertains to planning the remediation of hydrocarbon-contaminated soil at Saviktok Point. Contains: a copy of a QA/QC report on work completed by ESG at the former tank farm during the 2001 field program. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; Other - Non-DEW Line Site. Organizations mentioned in the file include: Biogenie SRDC Incorporated Montreal; Biogenie SRDC Incorporated Sainte-Foy; Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Regional Corporation; SGE Group; UMA Engineering. | 1999/05/03-2002/02/14 |

The file contains sections on Landfill Excavation, Off-Site Transportation, Disposal Options and References. Further attached are appendices in regard to Transportation of Dangerous Goods, FELEC Closure Protocols, Disposal Facility Requirements and Container Selection. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT; PIN-4 BYRON BAY - NUNAVUT. Organizations mentioned in the file include: Jacques Whitford Environmental Ltd; Sheppard Green Engineering & Associates Limited; UMA Engineering. | 1993/11/16 |
| 2210 | R112 | RG24 | 2021-00207-1 | 138 | 7690-DLCU001-F06022 | | Report on Environmental Issues Related to the DEW Line Clean Up | File contains a final discussion paper reporting on environmental issues with the DEW Line Clean Up. The report is separated into sections labelled Classification of Contaminated Soils and Materials, Landfill Excavation, Local Handling and Transportation, On-Site Storage, Off-Site Transportation, Disposal Options and appendices in regard to Currently Proposed Material Removal/Disposal Protocols, Portable PCB Test Kit Research, Miscellaneous Project Documents, Provincial Questionnaires and Disposal Facility Requirements. | Locations mentioned in the file include: Other - No location indicated in file. Organizations mentioned in the file include: Jacques Whitford Environmental Ltd. | 1993/09/22 |
| 2211 | R112 | RG24 | 2021-00207-1 | 138 | 7690-DLCU001-F06024 | | Environmental Screening Report for Six DEW Line Sites within the Inuvialuit Settlement Region | File contains an environmental screening report for 6 DEW Line sites within the Inuvialuit Settlement Region. The report includes sections pertaining to Key Elements of the Cleanup, Environmental Overview, Site Investigations, Community Consultations, Cumulative Effects, Site Specific Summaries, Project Summary, and Sources of Information. The document also contains annexes pertaining to the General Protocol, the Barrel Protocol, the Post Cleanup Landfill Monitoring Plan, and the Northern Disposal Facility. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; PIN-1 CLINTON POINT - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC. | 1995/11/01- 1995/11/30 |

| 2212 | R112 | RG24 | 2021-00207-1 | 138 | 7690-DLCU001-F06025 | | DEW Line Clean-Up Specification and Costing Phase I Surplus Facilities | File is a bound report in regard to specification and costing of facilities at select DEW Line locations. The report provides real property tables with building descriptions, construction data, facility purpose and utility information. Report also has plot plans for sites as well as descriptions of non DEW Line sites. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; Other - Non-DEW Line Site PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: North Warning System Office. | 1988/01/01-1992/05/08 |
| 2213 | R112 | RG24 | 2021-00207-1 | 138 | 7690-DLCU001-F06051 | | General Information - VOL. 2 | File contains a May 1991 revised draft of volume 2 of the 24-volume UMA report titled 'Environmental Clean-Up Study of 21 DEW Line Sites in Canada.' The volume discusses general information; the study approach for Phase I to III and for a risk assessment; a regional environmental overview, including climate information; wildlife; heritage resources; facilities; decommissioning and site restoration alternatives and disposal options; cost estimates; and site ranking priorities. Also contained in the report are a general site map, Gantt charts for a work plan, toxicity data for potential carcinogens, and drinking water quality guidelines. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Hardy BBT Limited; Jacques Whitford Environmental Ltd; UMA Engineering. | 1991/05/31 |
| 2214 | R112 | RG24 | 2021-00207-1 | 138 | 7690-DLCU001-F06056 | | ESG Reports (BAR-2, BAR-3, PIN-M, PIN-3, CAM-M, CAM-3) | File is 6 bound reports that relate to environmental investigations the BAR-2, BAR-3, PIN-M, PIN-3, CAM-M, and CAM-3 sites. Each of the reports shows general site characteristics, coordinate data for sampling locations, specifics on the sampling program, site photographs, general soil and water results, and a discussion on observations and analytical results for each of the 6 sites. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Fedirchuk, McCullough and Associates; Hardy BBT Limited; Jacques Whitford Environmental Ltd; UMA Engineering. | 1990/01/01-1990/12/31 |

The plan discusses the methods to be used for demolition, soil excavation, and disposal of hazardous or contaminated materials. One attachment within the plan contains documentation from Alberta Environmental Protection pertaining to requirements for disposal of hazardous waste. Although the work methodology plan pertains to PIN-M, it also discusses plans to transport waste materials or contaminated soil away from BAR-3, in some cases to be landfilled at PIN-M and in other cases to be disposed of at southern facilities. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Inuvialuit Projects Inc. | 1997/07/10 |

| 2257 | R112 | RG24 | 2021-00207-1 | 142 | 7690-DLCU001-F06122 | | PIN-2: Cape Young | File consists of a small package of material containing a general report on PIN-2, discussing general site characteristics, previous investigations, sample summaries, and cleanup proposals, and containing colour photographs of the beach and sample locations, and coloured technical drawings. The package also contains additional material, such as geodetic data, a contaminant map, a site action plan from EBA Engineering, and information from an asbestos survey. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. Organizations mentioned in the file include: UMA Engineering. | 1993/04/01 |
| 2258 | R112 | RG24 | 2021-00207-1 | 142 | 7690-DLCU001-F06123 | | DEW Line Clean Up Project - PIN-2, Cape Young - Field Survey Information - File: 1484-015-00-1180-3.6.14 - July 1993 | File contains several pages of unidentified technical data for PIN-2. File also contains a Site Summary Report on PIN-2 which discusses landfills. File also contains several Daily Summary Reports for PIN-2 discussing staff responsibilities, general location summaries, and several pages of handwritten field notes which discuss daily operations at PIN-2. File also contains photograph logs for PIN-2, and technical drawings of dormitories, hangars, and module trains. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. Organizations mentioned in the file include: UMA Engineering. | 1993/06/28- 1993/07/22 |
| 2259 | R112 | RG24 | 2021-00207-1 | 142 | 7690-DLCU001-F06124 | | DEW Line Clean Up Project - File: 1484-015-0151-3.6.4 - PIN-3, Lady Franklin Point Site Summary Report July 22, 1992 | File contains a PIN-3 Summary of Information Package including an overview of the site, technical drawings of elevation of buildings, hangars, and tanks. File also contains UMA Inspection Reports, and several pages of unidentified technical data for PIN-3. File also contains a blue floppy disc in an untitled padded brown envelope. | Locations mentioned in the file include: PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: EBA Engineering Consultants; UMA Engineering. | 1992/07/11- 1992/07/22 |
| 2260 | R112 | RG24 | 2021-00207-1 | 142 | 7690-DLCU001-F06126 | | DEW Line Clean Up Project - PIN-1 Site Survey Information - File: 1484-015-00-1489-3.6.13 - July 1993 | File discusses aspects of PIN-1 clean-up. File contains 2 copies of a Site Summary Report for PIN-1 discussing landfills and demolition, Daily Summary Reports, Landfill reports, and handwritten field notes. File also contains a DEW Line As-Built Drawing Index by the US Air Force in January 1993. File also contains several pages of PIN-1 technical drawings of hardware and insulation, a report titled 'PIN-1 Clinton Point' containing UMA Engineering Chain of Custody records, asbestos surveys, technical drawings, facilities index, and general demolition information. File also contains a PIN-1 Video Tape Index and several pages of unidentified datasets of PIN-1 raw data. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: UMA Engineering. | 1993/07/13- 1993/07/20 |

The wide variety of topics discussed include landfill design and construction, a biophysical assessment of the marine impact of the project, a survey of property at FOX-5 to be used by the North Warning Service, and a billing disagreement between DCC and a contractor. The file also contains copies of presentation slides for a spring 2003 community meeting in Qikiqtarjuaq, a 2005 memo reviewing DLCU site investigation procedures in light of the discovery that buried debris at Borrow Area 2 had been missed, a draft 2006 Environmental Disclosure Report on the Heated Vehicle Storage Building and Beach Fuel Storage Site, a signed copy of a Memorandum of Agreement between the Government of Nunavut and DND permitting DLCU soil remediation activities at FOX-5, and an October 2008 Environmental Assessment of the Hamlet Quarry Buried Debris Area. The file contains a colour copy of an aerial vertical photo and various black-and-white copies of photos. Although the file pertains mainly to FOX-5, various other DEW Line sites are also discussed. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT. | 2295 | R112 | RG24 | 2021-00207-1 | 145 | 7690-DLCU001-F06191 | | DEW Line - Broughton Island - FOX-5 - 0171-120 - DCC - 1.1 - Vol. 2 | UMA file containing a variety of material to, from, or related to DCC, regarding the DLCU project at FOX-5. Among other things, the material discusses where landfills and landfarms should be located, which property should be retained by DND or turned over to others, how remediation should be conducted around buildings that local parties wished to retain, and municipal authorities' preferences or requirements about these issues. The file also contains email correspondence with members of a Nunavut Steering Committee, a report and record drawing pertaining to the 2002 creation of an interceptor trench at the beach tank farm, and a copy of excerpts from an ESG report on supplementary delineation carried out at FOX-5 in 2000. Although the file pertains mainly to FOX-5, the file also contains substantive information on several other DEW Line sites, including Site Use Restriction documents on both CAM-2 and FOX-5. | Locations mentioned in the file include: CAM-2 GLADMAN POINT - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. | 2430 | R112 | RG24 | 2021-00207-1 | 151 | 7690-DLCU001-F06565 | | DEW Line - CAM-4 - Pelly Bay - 0171-095 - Inspection Reports - UMA - 5.7 | UMA file containing reports and associated documentation related to demolition, landfill construction, and remediation work at CAM-4. The material includes inspection reports by UMA and a photocopy of a field book for the 2002 season, DCC weekly site reports from 2004 and 2005, and reports on the investigation in 2004 and 2005 of possible hydrocarbon contamination at the Upper Site and Lower Site at CAM-4. Some of the documentation also includes maps, drawings, copies of photos, data from monitoring wells or test pits, or data on granular fill hauled from particular borrow sources or placed at particular landfills. Although the file pertains mainly to CAM-4, it also includes email and associated copies of photos regarding groundwater discharge and drainage at the PIN-3 Main Landfill. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2002/07/18- 2005/07/12 |
| 2431 | R112 | RG24 | 2021-00207-1 | 151 | 7690-DLCU001-F06568 | | DEW Line - Pelly Bay - CAM-4 - 0171-127 - Geotechnical Inspections and Weekly Reports 5.5 - Vol. 1 | UMA file containing weekly site reports from EBA Engineering regarding landfill construction and other geotechnical work being carried out as part of the DLCU project at CAM-4 during the 2002, 2003, and 2004 seasons. Attached to some of the weekly reports are technical reports providing geotechnical analysis of granular fill samples. Also included in the file are minutes of two site meetings, data on groundwater monitoring well installation, a map for the Key Trench Excavation plan with handwritten comments about water runoff, and tabulated data on quantities of fill material obtained from particular borrow sources or hauled to areas requiring fill in 2002 or 2003. Although the file pertains mainly to CAM-4, the first document in the file also discusses the storage of equipment at CAM-M. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; Environmental Sciences Group / Royal Military College RMC; Kudlik Construction Limited; Nunatta Environmental Services; Sanexen Environmental; UMA Engineering. | 2001/10/10- 2004/07/05 |
| 2432 | R112 | RG24 | 2021-00207-1 | 151 | 7690-DLCU001-F06574 | | UMA cleanup material on CAM-4 | UMA file pertaining to cleanup work carried out at CAM-4 between 2004 and 2006. The file contains weekly site reports from DCC, some of which list personnel on site or provide attached data on earth materials hauled. Other materials in the file include minutes of pre-season meetings, data on groundwater monitoring well installation, maps showing monitoring wells or culverts, black-and-white copies of photos, and documentation discussing changes to the design of and remaining capacity of landfills at the site. Although the file pertains mainly to CAM-4, one email discusses the design and construction of a Tier II disposal area at FOX-M. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT; FOX-M HALL BEACH - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; Kudlik Construction Limited; Nunatta Environmental Services; UMA Engineering. | 2003/10/29- 2007/01/15 |

| 2571 | R112 | RG24 | 2021-00207-1 | 159 | 7690-DLCU001-F06900 | | DLC-4 - PHO - 8950 | Wallet is a collection of photographs material from the 2006, 2003, 2002, and 2001 cleanup seasons at the CAM-4 site. Original copy photographs show cleanup activities for the 2001 and 2002 field seasons, the excavation of material, demolition activities, workers at the site, ice and boats in the water, and waste removal. The report from the 2006 cleanup season related to Progress Claim 14 shows excavations of Tier II soils, water pumping, borrow areas before and after restoration, completed covers at landfarms, covering debris at the site, site workers, and the containerization of hazardous materials. The two bound reports from the 2002 cleanup season shows contaminated soils, removal of debris, hauling hazardous materials, removal of PAP materials, trench excavations, access roads washed by water, other road conditions, road repairing activities, removal of PCBs from the site, building the berm at the hazardous waste landfill, debris in trenches, and bagging asbestos at the site. The undated report of photographs shows furnace removal, demolitions of interior structures, and PCB and asbestos removal. The envelope contains photographs of the access road for the cleanup during the 2002 field season. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Kudlik Construction Limited. | 2001/01/01-2006/09/14 |
| 2572 | R112 | RG24 | 2021-00207-1 | 159 | 7690-DLCU001-F06904 | | CAM-5 - Mackar Inlet, Nunavut - Site Investigation - 2000 & 2002 | File consists of a copy of the CAM-5 DEW Line Site 2000 & 2002 Site Investigation final report prepared by ESG in April 2004. Report includes the investigation of contaminated soil, landfills, debris areas, drinking water and structural material, as well as the assessment of the proposed landfill and landfarm locations. The report additionally includes four appendices (Methods, Sample Locations, Data, and QA/QC) further detailing the site investigation conducted by ESG, as well as one annex providing the data collected by the Environmental Working Group. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; Environmental Working Group Material. | 2004/04/01-2004/04/27 |

| 2574 | R112 | RG24 | 2021-00207-1 | 159 | 7690-DLCU001-F06907 | | Photos - CAM-5 Macker Inlet - August 2-7, 1993 - Roll M | File contains a collection of photographs depicting the first assessment phase of the CAM-5 DEW Line Site, from August 2 to 7, 1993. The bound report includes 102 photographs in plastic sleeves: 36 in roll M, 37 in roll N, 25 in roll O, and 4 in roll P. The report includes lists of the four rolls of film, which provides a description and enumerates the photographs in the report. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: SGE Group. | 1993/08/02- 1993/08/07 |
| 2575 | R112 | RG24 | 2021-00207-1 | 160 | 7690-DLCU001-F06908 | | DEW Line Clean Up Project - CAM-5, Macker Inlet, NU - 2009 Geotechnical Quality Control Summary | File consists of a copy of the December 2009 EBA bound report concerning the CAM-5 DEW Line Site 2009 Geotechnical Quality Control Summary, which was submitted to AECOM. The report provides the description and geotechnical results of the CAM-5 DEW Line Site's borrow sources, construction activities and materials, as well as the quality control testing procedures, to verify that the geotechnical related activities were performed in accordance with the project's drawings and specifications. In addition to the five technical drawings and the 31 photographs, the report includes six appendices detailing the results of the 2009 CAM-5 geotechnical quality control program conducted by EBA: the particle size analysis summary, the field density and salinity test results, the monitoring well installation logs, the design directives, and a data CD. The Data CD at the end of the report appears to be a digital copy of the Geotechnical Quality Control Summary. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; EBA Engineering Consultants. | 2009/12/31 |

| 2582 | R112 | RG24 | 2021-00207-1 | 160 | 7690-DLCU001-F06916 | | CAM-5 Remediation Correspondence | File contains a collection of miscellaneous documents pertaining to the assessment phase and remediation phase of the CAM-5 DEW Line Site. The file includes meeting materials and correspondences pertaining to the site assessment, the tender process, the construction mobilization, and the remediation of the CAM-5 DEW Line Site. The file contains a copy of the Invitation to Tender for the Clean-Up and Restoration of the DEW Line Site at CAM-5, as well as a copy of the notification of award presented to Biogenie SRDC Inc. for the aforementioned contract. The file also includes correspondences providing comments and revision to the tender, design and specification documents, and to the contractor schedules and quantity amounts. The file also includes copies of the design revision No. 10 concerning the removal of PCB Paint at CAM-5, which include two tables pertaining to the identification and demolition of PCB amended materials: the analytical results concerning the PCB and lead in paint table, and the demolition requirements for painted major components table. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. The file concludes with the Canadian Coast Guard explaining that ship and sea access to CAM-5 is not an option. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Canadian Coast Guard; UMA Engineering. | 2004/12/14- 2005/02/08 |
| 2597 | R112 | RG24 | 2021-00207-1 | 161 | 7690-DLCU001-F06940 | | DEW Line - Mackar Inlet - CAM-5 - 0171-120 - Nunavut Expediting 1.5.1 | File contains a collection of documents pertaining to the equipment management of the CAM-5 DEW Line Site during the assessment and remediation phases of the cleanup project. The file includes a correspondence between UMA and the Nunavut Expediting Services Ltd. confirming that the Provision of Camp Services at the CAM-5 DEW Line Site contract was awarded to the Nunavut Expediting Services Ltd. The file additionally contains a report, prepared by Biogenie S.R.D.C. Inc., concerning the scouting of the overland route to the CAM-5 DEW Line Site, which includes 70 printed photos of the overland route, and confirms the assumption made in the Mobilisation Plan; that the proposed route to CAM-5 is accessible in winter. The file also includes correspondences between Biogenie and DCC concerning the quantity of Type II granular material required for the remediation of the CAM-5 DEW Line Site. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Biogenie SRDC Incorporated; Defence Construction Canada Ltd Other; Nunavut Expediting Services Limited; UMA Engineering. | 2002/05/28- 2008/12/16 |

The plan was prepared in July 2002 by ESG and UMA for DCC. The plan provides a summary of the assessment activities which will be carried out during the 2002 site re-visit, which includes site surveys, landfill assessments, and soil sampling of hydrocarbon impacted areas, contaminated soil area, and debris area. The plan also includes logistical information and a section on the archeological resources, as well as 15 technical drawings of the CAM-5 DEW Line Site, and copies of the 1993 UMA drawings of the CAM-5 site. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2002/02/18- 2002/07/31 |

| 2629 | R112 | RG24 | 2021-00207-1 | 163 | 7690-DLCU001-F07033 | | CAM-5 - Mackar Inlet, Nunavut - Site Delineation, 2000 | File consists of a copy of the CAM-5 Site Delineation report, which was prepared by the Environmental Sciences Group in June 2001. The report provides information about the summer 2000 site investigation season conducted by ESG at the CAM-5 DEW Line Site, in which ESG oversaw the delineation program of the site. The site delineation includes soil, landfill and drinking water investigations, as well as assessments of proposed landfill locations and structural materials. The report concludes with two tables which provide a summary of the site delineation results and a summary of the contaminated areas located at the CAM-5 site. The report additionally includes four appendices (Methods, Sample Locations, Data, and QA/QC) which provides further information about the site investigation program. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. | 2675 | R112 | RG24 | 2021-00207-1 | 167 | 7690-DLCU001-F07127 | | Specifications for the Cleanup of CAM-5, Macker Inlet - DEW Line Site | File is a bound report that contains multiple final reports relating to the cleanup of the CAM-5 site. There are two copies (one of which is partial) that show the specifications for the cleanup of the site and include: a schedule of unit prices, schedule of prime cost allowances, mobilization and demobilization specifications, project photographs, temporary facilities, fire safety requirements, environmental protection procedures, contaminated soils, asbestos abatement, landfill excavation, and instrumentation used. These specifications also include the demolition inventory at the site, site photographs of demolition, analytical results from paint samples contains PCB, demolition disposal requirements, the permit for equivalent level of safety, and the environmental protection plan from UMA and EBA. Also included in this file is a regular tender form from DCC, the notification of award to Biogenie for cleanup services at the site, the contractor's Inuit participation plan, Biogenie's work methodology plan, DCC comments on the work methodology plan from Biogenie, a copy of the letter of Intent from Biogenie, an amendment to the invitation to tender, a copy of the NTI-DND economic agreement for Inuit benefits during the cleanup of the site, a list of Inuit firms, and a list of Inuit available for employment for the cleanup project. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Biogenie SRDC Incorporated; Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; Nunavut Tunngavik Incorporated; SGE Group; Transport Canada; UMA Engineering. | 2005/08/31- 2006/06/30 |
| 2676 | R112 | RG24 | 2021-00207-1 | 167 | 7690-DLCU001-F07141 | | PIN-3 | File contains email correspondence between DCC and DND attaching a DEW Line Record of Visual Inspection Declaration agreeing to allow Inuit participation at PIN-3. File also contains a DND letter to Fisheries and Oceans Canada discussing sampling results at PIN-3 including appendices containing sampling and area maps of the remediation at PIN-3 as well as analytical data in the form of soil samples, and site photos which are black-and-white photocopies of PIN-3 antennae and batteries. | Locations mentioned in the file include: PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Fisheries and Oceans Canada; Department of National Defence; Environmental Sciences Group / Royal Military College RMC. | 2004/12/14- 2005/07/07 |

The file includes a copy of the EBA final report concerning the Geotechnical Site Investigations and Preliminary Landfill Designs for the CAM-5 DEW Line Site, which was submitted to UMA in March 2003. The report provides the results collected during the 1993, 2000, and 2002 assessment site visits of the CAM-5 DEW Line Site conducted by EBA. The report includes a summary of the site's conditions, a section on the geothermal analyses, a description of the existing landfills, debris areas and borrow sources, as well as the proposed new landfill and landfarm locations and design concepts. The report contains a collection of technical drawing, as well as five appendices, which includes the Geophysical Survey Procedures, Testpit Logs, Geotechnical Laboratory Analysis Results, 2000 and 2002 Site Visit Photographs, and Geotechnical Report - General Conditions. In addition to the bound report, the file includes EBA correspondences which provide further details about the assessment process of the CAM-5 DEW Line Site, such as the November 16, 2001, letter addressing UMA's questions concerning the landfill excavation of the north lower site landfill, the key trench excavation of the upper station landfill, the proposed landfill location No. 4 and 3, and the quantities of granular materials. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: EBA Engineering Consultants. | 2001/11/16-2012/02/07 |

| 2815 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07450 | | PIN-1 Clinton Point Baseline Landfill Monitoring Report | File consists of a final copy of the Baseline Landfill Monitoring Report for PIN-1, prepared by UMA in May 2004. The report summarizes the condition of each landfill at PIN-1: Station Area Landfill (Northwest and Southwest), Beach Landfill (South and North), and the Non-Hazardous Waste Landfill. The report provides a brief description of each landfill, a qualitative assessment of the potential environmental risk associated with them, and a summary of the remediation design and the baseline conditions of the landfills. The report includes tables of data compiled, multiple technical drawings, and colour photographic images, as well as one Appendix: the PIN-1 Landfill Monitoring Year 1 Summary. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: UMA Engineering. | 2004/05/07 |
| 2816 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07453 | | Concept Design Report - Landfill for PCB-Amended Painted Materials - PIN-1: Clinton Point DEW Line Site | File consists of a finalized and signed bound report prepared by UMA in May 2000, in association with EBA Engineering Consultants, and submitted to DND and DCC in June 2000. The site concept design report for the Landfill for PCB-Amended Painted Materials, includes an overview of the PIN-1 site conditions as well as monitoring requirement, a set of proposed locations, and design concepts for the landfill. The report concludes with sections on the construction implementation and limitations of the landfill. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; UMA Engineering. | 2000/05/01- 2000/06/30 |
| 2817 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07459 | | DLP1 - BEN - 8880 | File contains a collection of semi-monthly reports as well as a final report produced by the contracting company E. Gruben's Transport. The file includes five Semi-Monthly Inuvialuit Benefits Updates for the PIN-1 DEW Line site from July 16 to September 30, 2001, as well as one Semi-Monthly Inuvialuit Benefits Update for BAR-2 for July 16-31, 2001. The file also contains the Final Report of the Inuvialuit Benefits Update for July 1-September 30, 2002, for PIN-1. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: E Gruben's Transport. | 2001/09/24- 2002/11/05 |
| 2818 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07460 | | DLPWK - RPT | File contains weekly reports prepared by the Environmental Science Group (ESG), which were sent to UMA and DCC for review. The weekly reports chronicle ESG's progress at the PIN-1 DEW Line site, summarize logistical issues, provide a record of communications, and list the number of samples procured from the site. The file compiles the weekly reports from August to September 2001, and from July to September 2002. The file also includes the PIN-1 site meeting minutes of September 1, 2002, which deal with the work progress at the site and discuss upcoming scheduled activities. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2001/08/13- 2002/09/03 |

| 2819 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07464 | | DLP1 - SCI | File contains documents pertaining to the dewatering of the landfarm area and sewage lagoon at the PIN-1 DEW Line site. The file includes a letter report by ESG summarizing the dewatering activities at PIN-1. The report consists of daily reports of activities, final observations and recommendations, and 14 colour photographs depicting the progress of the project. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Discovery Mining Services; Environmental Sciences Group / Royal Military College RMC; Indian and Northern Affairs Canada; Inuvialuit Projects Inc; Osprey Scientific Inc; UMA Engineering. | 1999/06/18-2003/08/01 |
| 2820 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07466 | | DLP1 - REP | File consists of eight Weekly Report, 2 reports by UMA and 6 reports by ESG, in which they summarize the progress made to the PIN-1 site during the summer work session of 2001. The UMA reports of October 7 and September 17, 2001, included a weekly summary, a status of the work, a list of the personnel on site, and general comments on the PIN-1 site. The ESG weekly reports for the PIN-1 site of August 19 and 26, September 23 and 30, and October 7, 2001, are included in the files, as well as the August 19 weekly report for the FOX-5 DEW Line site. The ESG reports consisted of logistical issues, weekly summaries of work and a record of communication. | Locations mentioned in the file include: FOX-5 BROUGHTON ISLAND - NUNAVUT; PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2001/08/19-2001/10/10 |
| 2821 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07467 | | DP1 - PROP | File contains a collection of document pertaining to the possession of the land of certain DEW Line sites (BAR-3 and 4, PIN-M and 1, CAM-M and FOX-4), and the scope of transferring the property. Included in the file are the meeting minutes for two meetings which took place on May 30 and September 20, 2000, between DCC, PWGSC and NWSO, on the status and next step for the aforementioned six DEW Line sites. The file contains three copies of the Properties Status Update Meeting from September 20, 2000, each of which have unique handwritten annotations. The file additionally includes a site visit report from I.L.A's inspection of the PIN-1 site on August 27, 2003. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Inuvialuit Land Administration; North Warning System Office; Public Works and Government Services Canada. | 1999/11/17-2003/09/22 |

| 2822 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07470 | | DLP1 - PCB | File contains a copy of the Environmental Impact Summary Table, which describes, outlines the significance of, and recommends solutions to the environmental impacts that afflict the DEW Line sites. The file also contains the DEW Line Clean Up PCB Storage Area Contingency Plan and Log for PIN-1, which includes sections on the facility's requirements, the site's layout and management, and the way to decommission the facility, as well as a fire and spill contingency and reporting plan. The file also includes correspondence from the Inuvialuit Game Council to the Environmental Impact Screening Committee, commenting on the cleanup of PIN-1. The comments refer to the possibility of additional archeological sites that may not be covered by the Archaeologist permit, as well as the Game Council's intention to be more involved in the cleanup of PIN-1, by proposing to have the Hunters and Trappers Committee (HTC) monitor the site to ensure their needs are being met. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Environmental Impact Screening Committee; Inuvialuit Game Council; UMA Engineering. | 2000/10/17- 2002/08/09 |
| 2823 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07473 | | DLP1 - GEN | File contains memos from the Environmental Sciences Group, documenting the water results, and permafrost parameters of the PIN-1 site. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering; United States Environmental Protection Agency. | 1999/06/15- 2001/09/11 |
| 2824 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07474 | | DLP1 - ENV | File contains an assortment of documents pertaining to the Environmental Sciences Group and their project at the PIN-1 DEW Line site. The file includes a final report from April 2004, on the Confirmatory testing of PCB-Amended Painted Material Storage Pad at PIN-1, which reviews the collection of samples procured in 2003. The file also includes multiple copies of the meeting minutes as well as ESG's section of the presentation for the community meeting which took place in Paulatuk on April 23, 2001. The file additionally contains a draft copies of UMA's code of practice for the land treatment and disposal of soil containing hydrocarbons, produced in May 2000, as well of the Cleanup Implementation Plan for the PIN-1 site which is heavily annotated from July 2000. The file contains multiple technical drawing and maps of the PIN-1 site, including the PIN-1 Clinton Point Environmental Impact Screening Committee Submission from September 2000, which is comprised of 13 technical drawings (2 structural plans and 11 siting plans). | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 1999/12/16- 2004/04/30 |

| 2825 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07475 | | DLP1 - ENG | File contains material about PIN-1, much of it produced by UMA and much of it focused on the environmental impact of the cleanup project. The file includes printouts from the Environment Canada website pertaining to different species of wildlife that inhabit the environment of the DEW Line sites. The file also contains multiple reports, such as the August 2000 working draft of the Environmental Screening Report for the PIN-1 cleanup project, which includes many handwritten annotations. Another item is the March 2001 UMA final report on the Evaluation of Potential Contractual & Construction Risk for PIN-1, which highlights the risk ranking of the site and includes an annex evaluating the quantity of contaminated soil at PIN-1. Also found in the file is the summary of the Specification Review Meeting, in which UMA, DCC and EBA reviewed the general Measurement for Payment Items for the PIN-1 project. The file also contains the Environmental Protection Plan for PIN-1, which discusses general and specific environmental protection measures, as well as contingency plans. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; SGE Group; UMA Engineering. | 2000/03/31- 2003/02/27 |
| 2826 | R112 | RG24 | 2021-00207-1 | 175 | 7690-DLCU001-F07477 | | Landfill Monitoring Final Report - PIN-M Cape Parry | File consists of the signed final report on the landfill monitoring carried out at PIN-M in 2003. The report, which was prepared for DCC by IEG Environmental Consultants Limited, includes an overview of the 2003 Landfill Monitoring Program, a section to explain the methodology used, and a review of the monitoring results for PIN-M. Also included in the report are six appendices, which contain tables, figures, Monitoring Well Development records, 25 colour photographic images, analytical lab results, and field notes. This copy of the report is missing the first page, which contains the introduction. | Locations mentioned in the file include: PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; IEG Environmental Consultants Limited. | 2004/01/22 |

| 2868 | R112 | RG24 | 2021-00207-1 | 179 | 7690-DLCU001-F07557 | | Specifications for the Cleanup of - PIN-2, Cape Young - DEW Line Site | File includes the November 2008 final version, with wet signatures, of the Specifications for the Cleanup of PIN-2, Cape Young DEW Line Site, prepared by UMA/AECOM in association with HATCH Ltd. and submitted to DND. The report is divided into two sections between the General Requirements (logistics, health and safety, equipment) and the Site Construction, which presents an overview of the different tasks of the remediation project (demolition, debris removal, and landfill waste and buried debris excavation). In addition to the list of appendices, the report provides a list of technical drawings required for the projects. This iteration of the report has all the appendices attached in the file: Demolition Inventory, PCB and Lead in Paint, Demolition Disposal Requirements for Painted Major Components, Permit for Equivalent Level of Safety, Site Photographs, Environmental Protection Plan, and Geotechnical Information. The Geotechnical Information appendix consists of the EBA's 2004 Geotechnical Investigation of the PIN-2 DEW Line Site. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Department of National Defence; EBA Engineering Consultants; Hatch Limited; UMA Engineering. | 2008/11/01-2008/11/30 |

| 2876 | R112 | RG24 | 2021-00207-1 | 179 | 7690-DLCU001-F07569 | | PIN-2 Cape Young - Preliminary Quantitative Risk Assessment - (Human Health) - Final Report | File consists of a copy of the finalized report prepared by Franz Environmental Inc. pertaining to the Preliminary Quantitative Risk Assessment, for human health, of the PIN-2 Cape Young DEW Line Site. The report, which was submitted to DCC and DND in January 2007, includes an introductory characterization of the site, sections on exposure, toxicity and hazard assessments, as well as a concluding section which summarizes the results of the investigation and provides recommendations for the remediation of the PIN-2 DEW Line Site. The report also contains appendices which provide the data from the risk assessment investigation: PQRA Spreadsheet Models of Petroleum and Non-petroleum Hydrocarbons, Summary of Toxicological Input Values and Effects, and FCSAP Scoring Sheets. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Franz Environmental Incorporated. | 2007/01/17 |
| 2877 | R112 | RG24 | 2021-00207-1 | 179 | 7690-DLCU001-F07570 | | Final Report on DLCU Project - Archaeological - Mitigation Study at PIN-2, - Cape Young, Nunavut | File consists of a copy of the Final Report on DLCU Project Archaeological Mitigation Study at PIN-2, Cape Young, Nunavut prepared by Thompson Heritage Consultants and Jacques Whitford Limited and submitted to DCC on March 31, 2005. The report is accompanied by correspondence between DCC and Jacques Whitford Limited, which documents that the report does not require further revisions and is acceptable for further distribution. The report includes sections on the Cultural Heritage Resources of the PIN-2 Site, the Methodology of the investigation, the Results of the archaeological survey, and concludes with a section which provides recommendations about the mitigation of the archaeological sites. In addition to the Appendices - which contains the Archaeological Site Forms, the Site coordinates and a copy of the Archaeologist Permit No. 04-11A - the report includes a table in the executive summary of the Summary of PIN-2 Archaeological and Contemporary Site Significance and Mitigation Requirements which provides an overview of the report. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. The first report is EGT's HSE (Health, Safety and Environment) Manual prepared in September 2009, with the aim to present an overview of the health and safety precautions that are required to ensure a safe and optimal work environment. The second report is the PIN-2 Partnering Session Report prepared by P3 Advisors to summarize the April 23, 2010, meeting that included representatives from DND, EGT, DCC, AECOM, ESG and NTI. The report is accompanied by two copies of the new PIN-2 Partnership Charter which was created on April 23, 2010, Partnering Session. In addition, the wallet contains the EGT's, August 19, 2011, Manufacturers' Data Book, which focuses on the Geotextile, Geomembrane, Thermistors and Monitoring Wells of the PIN-2 DEW Line Site. The Design Revision Number 1, Class C Estimate, provides a cost estimate for the removal of PCB Paint from PAP Material at the PIN-2 site, and includes a finalized version of the PIN-2, PCB Paint Removal, Design Revision No. 1, is also included in the wallet. The final report entered in the wallet is the AECOM, November 25, 2009, Geotechnical Quality Assurance Summary, which provides an overview of the quality control data collected by AECOM during the 2009 construction season at the PIN-2 DEW Line Site. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT; PIN-4 BYRON BAY - NUNAVUT. | 2912 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07669 | | DLPM - MON | File pertains to the monitoring of the BAR-4 and PIN-M DEW Line sites. The file includes the monitoring proposal of Inuvialuit Environmental and Geotechnical Inc. (IEG) for BAR-4 and PIN-M, as well as DCC correspondence evaluating the bid and the requirements needed to make the proposal more competitive. The file also contains the October 1999 EBA report on the site inspection of PIN-M, which was carried out in September 1999. The report is divided into five parts, each of them focusing on one of the PIN-M landfills: Station Area Landfill Extension, Main Landfill East, Main Landfill West, West Point Landfill, and West Landfill. The report includes 46 colour photographic images of the landfills, as well as a technical drawing and summary of the visual assessment of the landfills. The file also includes the 14 April 2000 ESG Implementation Plan for the 2000 Field Season Landfill Monitoring at PIN-M. | Locations mentioned in the file include: BAR-4 NICHOLSON PENINSULA - NWT; PIN-M CAPE PARRY - NWT. | 2913 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07672 | | DLPM - ENV | File contains a copy of the Instruction for the Establishment, Operation, and Decommissioning of PCB Storage Facilities for the DEW Line Cleanup Project, as well as an electronic copy of the report on a 3.5 inch floppy disk. The file also contains a copy of the January 1997 Environmental Protection Plan produced by UMA, in association with Jacques Whitford Environmental Limited and the SGE Group, as well as correspondence providing revisions to the report. Additional reports are also found in the file, such as the Disclosure Report for Cape Parry, PIN-M DEW Line Clean Up, and ESG's PIN-M Barrel Report, which provides tables about the remaining PCB containers at PIN-M, and their disposal summary. | Locations mentioned in the file include: PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; Jacques Whitford Environmental Ltd; SGE Group; UMA Engineering. | 1997/01/01-2007/06/14 |
| 2914 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07673 | | DLPM - ENG | File contains 11 as-built technical drawings pertaining to the PIN-M DEW Line site, as well as three tables summarizing the waste identification at BAR-3. The three tables divide the waste into three groups: CEPA PCB Painted Materials, Tier 1 and Tier 2 PCB Painted Material, and Miscellaneous Hazardous Waste. The file also includes the draft version, with many annotations and revisions, of the Site Use Restrictions for the PIN-M site, designed to prevent interference with the North Warning System, as well as a memo reporting on the PIN-M site inspection of August 3, 1998. Also included in the file are lists summarizing the quantities of granular material required for the PIN-M and CAM-M sites. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; UMA Engineering. | 1996/09/17-2003/09/08 |

| 2915 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07674 | | DLPM - PROP | File consists of a collection of property documents, such as multiple copies of unsigned Memorandums of Agreement for the PIN-M site, including the Annex R Lands agreement and the Environmental Disclosure agreement. The file also contains a copy of the Disclosure Report for Cape Parry, PIN-M DEW Line Cleanup, which includes an Environmental Summary table for PIN-M. Additionally, many meeting materials are provided in the file, such as the minutes and notes of service of the Properties Status Update Meetings which took place between May and September 2000. The status and next possible steps concerning BAR-3, BAR-4, PIN-M, PIN-1, FOX-4, and CAM-M were discussed in these meetings. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Inuvialuit Land Administration; Inuvialuit Regional Corporation; Public Works and Government Services Canada; UMA Engineering. | 1997/05/06-2003/10/23 |
| 2916 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07676 | | DLPM - PCB | File pertains to the transportation of hazardous PCB materials from the BAR-3 site to the PIN-M site. The file contains correspondence and tables that index the containerized material from BAR-3 which will be transported to PIN-M. The file also includes finalized versions of reports such as the Operation and Contingency Plan for the Cape Parry, NWT PCB Storage Facility, and the Storage of PCB Material Regulations. Other correspondence in the file pertains to the establishment of a temporary PCB storage area required at PIN-M. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; UMA Engineering. | 1997/08/08-2002/10/24 |

(IPI) carried out remediation of the PIN-M DEW Line Site. The file includes a contract Work Breakdown Structure as well as correspondence from July to September between IPI, DCC, and other organizations, such as E. Gruben's Transport (EGT) and EBA. The numerous subjects discussed in the file include granular fill and borrow sources at PIN-M, and the transportation of material from BAR-3 to the PIN-M landfill for disposal. The file also contains minutes of the 27 July 1997 meeting between IPI, EGT, DCC, the Inuvialuit Land Administration (ILA), UMA, and ESG, as well as IPI's weekly reports from July to August 1997. | Locations mentioned in the file include: BAR-3 TUKTOYAKTUK - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; E Gruben's Transport; EBA Engineering Consultants; Inuvialuit Projects Inc. | 1997/07/21-1997/09/01 |

The file includes the minutes, prepared by DCC, of four 1997 meetings (June 9, July 23, September 4, and October 15), as well as of one meeting which took place on June 24, 1998. The meetings focused on the issues and progress in the DLCU work at PIN-M, and were attended by representatives of Inuvialuit Projects Inc. (IPI), E. Gruben's Transport (EGT), UMA, DCC, the Inuvialuit Land Administration (ILA), and ESG. The file also contains correspondence from IPI providing revisions to the minutes for the meeting of September 4, 1997. | Locations mentioned in the file include: PIN-M CAPE PARRY NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; E Gruben's Transport; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Land Administration; Inuvialuit Projects Inc; UMA Engineering. | 1997/06/19- 1998/06/28 |

[IPI] and UMA). | Locations mentioned in the file include: PIN-M CAPE PARRY NWT. Organizations mentioned in the file include: Inuvialuit Projects Inc; UMA Engineering. | 1997/04/02- 1998/12/01 |
| 2925 | R112 | RG24 | 2021-00207-1 | 182 | 7690-DLCU001-F07699 | | 08 - DLPM - 8111 - GEN | File contains a variety of material pertaining to contract 8111, under which PIN-M was cleaned up. Part of the file contains PCB material inventories. The latter documents cover July 7-August 3, 1998, and present an overview of the quantities of materials hauled from PIN-M, as well as indicating the destination where those specific types of materials were discharged. The file also discusses the temporary storage of PCB materials, and provides detailed inventories of the hazardous materials in containers at PIN-M. Also found in the file is correspondence discussing the closure of the PIN-M remediation project, as well as a copy of the Final Certificate of Completion for the contract. | Locations mentioned in the file include: PIN-M CAPE PARRY NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; E Gruben's Transport; Inuvialuit Projects Inc; UMA Engineering. | 1998/07/18- 2003/12/15 |

The correspondence between Inuvialuit Projects Inc. (the lead contracting company at PIN-M), DCC, and the North Warning System Office allude to many of the remediation activities, such as gravel sourcing, sewage disposal, and disposal of non-hazardous and hazardous (asbestos and PCB) materials in the Cape Parry landfills, as well as excavation and monitoring programs. The file also includes soil sample test results provided by EBA and ESG. Also found in the file is a review of archeological sites near PIN-M. The review, prepared by the Inuvialuit Land Administration (ILA), consists of a short description and the coordinates for the sites in question. | Locations mentioned in the file include: PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; E Gruben's Transport; EBA Engineering Consultants; Environmental Sciences Group / Royal Military College RMC; Inuvialuit Land Administration; Inuvialuit Projects Inc; North Warning System Office; UMA Engineering. | 1997/07/21- 1997/12/04 |

| 2930 | R112 | RG24 | 2021-00207-1 | 183 | 7690-DLCU001-F07705 | | DL - 1 - ENG | The file consists of a wallet which holds two bound reports. The first report, produced by UMA in March 2001, is titled DEW Line Clean Up PIN-1: Clinton Point Evaluation of Potential Contractual & Construction Risk. The report, which contains many handwritten notes, indicates that the landfill excavation and the contaminated soil excavation are the two work items deemed to be the highest financial risks in the PIN-1 cleanup. The second item in the wallet is EBA's signed final report on the 2001 Construction Site Visit to PIN-1. The report discusses borrow sources, landfills, the landfarm, and variations from design and specifications, and also contains six appendices with data obtained through the 2001 site visits. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; SGE Group; UMA Engineering. | 2000/09/01- 2001/12/31 |
| 2931 | R112 | RG24 | 2021-00207-1 | 183 | 7690-DLCU001-F07707 | | DLP1 - PER | File consists of a wallet containing three bound reports prepared by UMA. The wallet contains a copy of the 12 February 2002 Contingency Plan for PIN-1, which describes the procedure for the initial action, the reporting procedure, and the action plan in case of an unexpected spill. The wallet also includes the 20 March 2002 Annual Report for Water Use Licence N7L1-1767, which summarizes the activities of the PIN-1 remediation project as they relate to the Northwest Territories Water Board. The report includes general background information about the PIN-1 site, a summary of water usage and monitoring results, and a report of any spills or unauthorized discharges. The wallet contains one copy of the 12 March 2003 Annual Report for the water use licence, which similarly reports on water usage at PIN-1, and on any spills and unauthorized discharges, as well as summarizing the Surveillance Network Program. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Northwest Territories Water Board; UMA Engineering. | 2002/02/12- 2003/03/12 |

| 2932 | R112 | RG24 | 2021-00207-1 | 183 | 7690-DLCU001-F07708 | | DLP1 - ENV | File consist of a wallet containing two reports prepared by DCC, each in individual red folders, as well as a set of 13 technical drawings. The first report, Submission to the Environmental Impact Screening Committee (EISC), includes a development summary highlighting the contractor's support activities, as well as a timetable for the cleanup project and an environmental overview and assessment. The report also contains two tables summarizing the scope of the project and the mitigation measures required for the anticipated environmental impacts, as well as seven annexes, which include the DND-IRC Cooperation Agreement, the Draft Environmental Protection Plan, the Proposed Landfill Monitoring Plan, and the minutes from a meeting in Paulatuk, NWT, regarding landfilling of PCB painted materials, held on July 5, 2000. The 13 technical drawings produced by UMA (which are outside the folder but inside the wallet) are also associated with the EISC submission, and provide maps of PIN-1 and the different landfills at the site. The second report, the Environmental Screening Report, includes a description of the project, an overview of the environmental regulations, and a description of the environment of PIN-1. The report also contains eight annexes, including the DEW Line Clean Up Protocol and the Federal Co-ordination Regulation Correspondence. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. | 2971 | R112 | RG24 | 2021-00207-1 | 185 | 7690-DLCU001-F07879 | | Design and Cost Estimating DEW Line JWEL Agreement - 1992/93 Work - File: 1484-015-00-1065-1.0 - June 3, 1993 | File consists of a signed sub-consultant agreement between UMA Engineering and Jacques Whitford Environmental Limited to provide assistance on Supply and Services Canada contract no. W5829-2-0149/01-SV for the design and cost estimating of the cleanup of ten DEW Line sites. In the agreement, JWEL agrees to provide services such as environmental site assessments, site characterization, on-site environmental sampling, laboratory testing, site remediation of contaminated soils, and hazardous waste disposal for decommissioning of the 10 DEW Line sites in the Northwest Territories and Yukon Territory. A letter is attached to the agreement and it addresses issues JWEL has with certain clauses in the agreement. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Jacques Whitford Environmental Ltd; Supply and Services Canada; UMA Engineering. | 1993/06/03 |
| 2972 | R112 | RG24 | 2021-00207-1 | 185 | 7690-DLCU001-F07881 | | DEW Line Clean Up Project - Associate Consultant Agreement (SHG) 0 File: 1484-015-00-0983 - February 3, 1993 | File consists of a copy of the associate consultant agreement between UMA Engineering and Sheppard Hedges & Green Ltd. to provide assistance on the design and cost estimating of the cleanup protocol for ten DEW Line sites. In the agreement, SHG agrees to assist in the preparation of construction implementation plans and cost estimating for decommissioning of the BAR-2, BAR-3, PIN-M, PIN-3, CAM-M, CAM-3, FOX-M, FOX-3, FOX-5, and DYE-M DEW Line sites. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Sheppard Hedges & Green Ltd; UMA Engineering. | 1993/02/03 |
| 2973 | R112 | RG24 | 2021-00207-1 | 185 | 7690-DLCU001-F07883 | | Memorandum for Members, Pilot Study on Environmental Aspects of Reusing Former Military Lands | File consists of a report on meeting minutes for an October 1997 meeting to discuss the CCMS pilot study on the environmental aspects of reusing former military land. | Locations mentioned in the file include: Other - Non-DEW Line Site. Organizations mentioned in the file include: Government of the United States. | 1997/11/25 |
| 2974 | R112 | RG24 | 2021-00207-1 | 185 | 7690-DLCU001-F07885 | | Design and Costing - Guidelines for Asbestos Control - 1484-015-1.1 | File consists of a memorandum forwarding a copy of DND's guidelines for asbestos control. Memorandum states that the guide and sample specifications are to be used to prepare project specifications for asbestos control and emphasizes the need for an asbestos survey. | Locations mentioned in the file include: Other - No location indicated in file. Organizations mentioned in the file include: UMA Engineering. | 1992/02/03- 1992/11/06 |

| 3090 | R112 | RG24 | 2021-00207-1 | 192 | 7690-DLCU001-F08237 | | Historical Ocean Disposal in the Canadian Arctic - Survey of Materials Disposed in Cambridge Bay and the State of the Marine Environment | File consists of a final copy of the 1994, Historical Ocean Disposal in the Canadian Arctic report concerning the state of the marine environment and provides a survey of the materials disposed in the Cambridge Bay. The report was prepared by Environment Canada, in association with ESG, and with the assistance from Natural Resources Canada, Heritage Canada, the Canadian Coast Guard and the Canadian Hydrographic Services, on the behalf of DND. The report summarizes the marine environmental investigation of the historic ocean disposal in Cambridge Bay which was conducted in August to September 1993. The environmental investigation's objectives were to investigate and assess the extent of the impact of PCB-containing equipment, to recover any equipment which would impact the quality of the environmental quality of Cambridge Bay, and to conduct scientific investigations comparing the impact of ocean disposal versus shore-based contaminant inputs. The report includes a review of the environmental investigation's methodology, a summary of the materials identified on the seabed, and an overview of the associated contaminants investigations. The report concludes by stating that the main source of PCB originates from the Hamlet dump, but that the CAM-M DEW Line Site is a potential source of PCBs to Cambridge Bay. The report additionally provides photographs of the environmental investigation, as well as table and technical drawings detailing the data collected during the investigation. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Canadian Coast Guard; Canadian Heritage; Department of National Defence; Environment Canada; Environmental Sciences Group / Royal Military College RMC; Natural Resources Canada. | 1994/05/01-1994/05/31 |

The report includes 17 printed coloured photographs depicting different elements from the CAM-M (Cambridge Bay) DEW Line Site, such as the communication dish, the sewage outfall, as well as landfills and debris areas. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: UMA Engineering. | 1999/02/01-1999/02/28 |
| 3097 | R112 | RG24 | 2021-00207-1 | 192 | 7690-DLCU001-F08246 | | Historical Resources Impact Assessment - Cambridge Bay DEW Line Clean Up Project - Cambridge Bay, Nunavut - Final Report | File consists of a copy of the February 1999 E.R.D. Heritage Consulting report concerning the Historical Resources Impact Assessment of the CAM-M DEW Line Site. The report prepared for Nunasi Projects Inc. summarizes the archeological fieldwork which was conducted between September 7 and 11, 1998, by E.R.D. Heritage Consulting. In addition to having revisited two previously identified sites, the fieldwork recorded six new archeological sites. The report includes a description and interpretation of the six new heritage sites, and provide additional photographs and map detailing the different archeological elements of the sites. The report concludes with a set of recommendations for the protection and preservation of the archeological sites to be employed during the remediation project of the CAM-M DEW Line Site. The report additionally includes two appendixes: a summary of the site visit conducted by Kitikmeot Heritage Society at Ekalluk River Project, and copies of the Canadian Museum of Civilization's site entry forms for the archeological sites visited during the fieldwork project of September 1998. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: E.R.D. Heritage Consulting; Nunasi Environmental Corporation. | 1999/02/01-1999/02/28 |

| 3100 | R112 | RG24 | 2021-00207-1 | 192 | 7690-DLCU001-F08250 | | Environmental Screening Report for the Cleanup of CAM-M, Cambridge Bay | File consists of the ESG's Environmental Screening Report for the CAM-M DEW Line Site. The report is divided into two sections the overview and the site specific section on the CAM-M DEW Line Site. The overview section provides information about the DEW Line Cleanup's rationale, the structure of the Environmental Screening Reports for the 21 DEW Line Sites, a review of the environmental and engineering site investigations, a description of the community consultations, and short summaries of the 21 DEW Line Sites, as well as two annexes: General DLCU Protocol, and DLCU Barrel Protocol. Also included in the middle of the overview section of the report is the Results for Cambridge Bay, CAM-M, which appears to be a passage from an unrelated report focusing on the CAM-M DEW Line Site, and provides additional charts and technical drawings detailing the results. The section focused on the CAM-M site includes a summary of the site-specific project, a description of the site's environment, and concludes with a review of the potential impacts arising from the cleanup project, and recommended mitigation protocols. This iteration of the Environmental Screening Report also contains handwritten annotations and paper notes, providing comments about the report and what additional elements (spill response plan, and post cleanup monitoring) should be included in the final version of the report. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. The report explains that the first visit was to provide quality assurance services during construction of the South Main Landfill, while the second visit was scheduled for EBA to act as the DCC representative, while the site representative was absent from the site. The report includes detailed summaries of both these visits as well as a section on the CAM-M ground temperature data collection. In addition to a section of UMA technical drawings, the report also contains eight appendices: the EBA daily summaries, the moisture density relationship, the grain size analysis, the salinity test results, Layfield's quality control documentation about the South Main Landfill, the field density test results pertaining the South Main Landfill, the construction photographs, and copies of the DCC weekly report No. 7 and 8. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. The site visits, which were organized to provide quality control services and confirm that the construction activities were following regulations, took place from June 26 to July 12, July 29 to August 3, and August 23 to September 3, 1999. The report includes sections on the Laboratory and Field testing, the Tier II soil disposal facility, the construction of a leachate containment system for the North Main Landfill, the Airstrip Landfill, and a final section on miscellaneous field density testing. In addition to a section containing UMA technical drawings, the report also contains seven appendices: the moisture density relationship, the grain size analysis, the salinity test results, three set of field density test results pertaining to the Tier II soil disposal facility, the North Main Landfill, and Miscellaneous locations (West and South Shore Landfills), and the construction photographs. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. In correspondence accompanying the April 1998 specifications, UMA informs DCC of the revisions made to the specifications, compared to the previous iteration from March 13, 1998. The specifications provide schedules A to D, information on the general requirements, the sitework, and the thermal and moisture protection, and five appendices: the demolition information, photographs, the geotechnical information, the environmental protection plan, and the site use restrictions. The 4 July 2003 specifications provide general instructions about the remediation project and the specific process of recontainerizing the PAP materials, as well as including sections on environmental protection and safety, medical, and security requirements. The document also contains three appendices: the site use restrictions, the Transport Canada Equivalent Level of Safety Permit, and an appendix of figures, which includes 12 photographic images and a technical drawing illustrating the PAP Material Container Location Plan. A blue label reading 'NTI Vs. AGC (DCC)' is attached to the wallet. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. The file contains a spiral-bound, wet-signature copy of the Preliminary Design Report submitted by UMA in May 2006, which discusses site investigation findings and provides recommended courses of action for remediation of specific landfills and debris areas, cleanup of contaminated areas, creation of new landfills, and use of borrow sources. The file also contains survey data, including a memo explaining the method by which site coordinates were established. Also found in the file are December 2007 plot maps with detailed information on contaminated areas, including coordinates, type of contamination, and expected volume of excavation. Finally, the file contains maps with working data about the size of contaminated areas. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; FOX-M HALL BEACH - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; Natural Resources Canada; SGE Acres Limited; UMA Engineering. | 2003/02/05-2007/12/12 |

The report provides the result from ESG's 1999, field season of confirmatory testing for the environmental cleanup of the CAM-M DEW Line Site. The report focuses on the Confirmatory Testing of the Sewage Outfall, the Delineation, Confirmatory Testing and Excavation of the Airstrip Landfill, the Delineation and Confirmatory Testing of the Main Landfill-South, as well as the Assessment and Confirmatory Testing of the Debris Area of the South Shore Landfill. In addition to concluding with a table summarizing the cleanup activities of the CAM-M Site as of 1999, the report includes four appendices (Methods, Sample Locations, Data, and QC/QA) which provide further details about the sampling program and the site investigation. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC. | 2000/02/29 |
| 3208 | R112 | RG24 | 2021-00207-1 | 199 | 7690-DLCU001-F08572 | | CAM-M Misc Docs 1986 - ESG-711 | File contains a collection of miscellaneous documents and reports from the Canadian Armed Forces pertaining to the 1985 joint DND and DIAND cleanup project. The April 1986 report prepared by the Construction Engineering Unit of the Canadian Armed Forces provides a summary of the July to August 1985 project to clean up the PCB and POL product from 22 abandoned military sites located along the DEW Line. The report concludes by stating that the contaminants were successfully removed three weeks ahead of schedule, and provides recommendations for any future joint remediation efforts. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; Other - Non-DEW Line Site PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Canadian Armed Forces; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 1986/04/01-1993/12/13 |

| 3209 | R112 | RG24 | 2021-00207-1 | 199 | 7690-DLCU001-F08575 | | ESG-881 - Preliminary Environmental Analysis of the Plans, Environmental Studies and Tender Documents Relating to the Cleanup of the Cambridge Bay (CAM-M) DEW Line Site | File consists of a copy of the 1995 report entitled Preliminary Environmental Analysis of the Plans, Environmental Studies and Tender Documents Relating to the Cleanup of the Cambridge Bay DEW Line Site. The report - which was prepared by Hycal Environmental Sciences Ltd., for the Nunavut Tunngavik Incorporated - provides a technical review of DND's specifications, drawings and supporting documents for the cleanup of the CAM-M DEW Line Site. The report categorizes five type of issues that arose from the plans, environmental studies and tender documents which were reviewed: the geotechnical issues, the cleanup design issues, the sampling and analytical issues, the project management issues, and the issues related to the long term monitoring program. In addition to presenting the issues with the DND documents, the Hycal report provides recommendations on how to mitigate the aforementioned issues. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Hycal Environmental Consultants Ltd; Nunavut Tunngavik Incorporated. | 1995/05/26 |

The first report deals with hydrocarbons, and the second with inorganic and PCB contamination. Each report discusses numerous locations around the site that were investigated, describes the results of the sample analyses carried out, and makes recommendations for addressing contamination discovered in that particular location. The reports include data tables, maps, and colour photographic images, as well as hydrocarbon evaluations for specific locations. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT. The work discussed includes investigative soil sampling, installation of groundwater monitoring wells, and sampling of drinking water. The report also contains remarks about a fuel spill, the discovery of unexploded ordnance (UXO), and the construction of berms, trenches, and a refuelling area. Also found in the report are maps, colour photographic images, methodological information, analytical data tables, and borehole and test pit stratigraphic and instrumentation logs. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT. Organizations mentioned in the file include: Environmental Sciences Group / Royal Military College RMC; Queens University; Royal Military College of Canada; TAIGA Environmental Laboratory. | 2004/05/01-2004/05/31 |

The file contains a copy of a DLCU package sent to the Department of Fisheries and Oceans (DFO) in early 2003 to apply for authorization for the CAM-2 cleanup, particularly with regard to the Beach POL (petroleum, oils, and lubricants) area and the Airstrip Landfill. The file also contains an 11 July 2003 DFO letter of advice. Also found in the file are memos and related material about design changes that had to be made to the temporary containment berm at the Beach POL area in 2004, and associated complications in cleanup of greater-than-expected hydrocarbon contamination in this area and other CAM-2 areas. Finally, a December 2002 paper on 'The Environmental Consequences of Historic Ocean Disposal in the Canadian Arctic' mentions a few DLCU sites and a few non-DLCU locations, such as Koojesse Inlet, Iqaluit, and Resolution Island. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; Other - Non-DEW Line Site. The first report is a record of recommendations from the NTI/DND Environmental Working Group regarding landfills and hydrocarbon contaminated areas at CAM-1 prepared in March 2005. The second report is the 2002 environmental site investigation of CAM-1 from ESG prepared in May 2004 providing the background information of the site, the site investigation program outline, and summary of the site investigation. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Environmental Working Group Material; Nunavut Tunngavik Incorporated. | 2004/05/01-2005/03/31 |
| 3234 | R112 | RG24 | 2021-00207-1 | 201 | 7690-DLCU001-F08630 | | CAM-1 Jenny Lind Island | File contains site investigation documentation regarding CAM-1 and prepared by EBA in 1993. This includes a site summary report, daily summary reports between July 14 and 19, a draft geotechnical field report, with a site map and daily logs reports of geotechnical work completed, photograph log of the site, survey dataset of the site debris area, and daily log of work completed by NW Wade. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT. Organizations mentioned in the file include: EBA Engineering Consultants; NW Wade. | 1993/07/14-1993/07/19 |

| 3235 | R112 | RG24 | 2021-00207-1 | 201 | 7690-DLCU001-F08631 | | DEW Line Clean Up Project CAM-1 (Jenny Lind Island) DEW Line Site 2002 Geotechnical Investigation Project No. 0101-94-10995.044 April 2003 | File consists of the 2002 geotechnical investigation of CAM-1 prepared by EBA. The sections of the report include introduction, site conditions, existing landfills, existing debris areas, proposed new landfill locations, granular borrow material, limitations, closure, and site photographs. The appendices of the report include geophysical survey procedures, testpit logs, geotechnical laboratory analysis results, and geotechnical report and the general conditions. There are also oversized maps of the CAM-1 prepared by UMA Engineering. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT. Organizations mentioned in the file include: EBA Engineering Consultants; UMA Engineering. | 2003/04/01-2003/04/30 |
| 3236 | R112 | RG24 | 2021-00207-1 | 201 | 7690-DLCU001-F08632 | | 2002 Site Investigation Implementation Plan CAM-1, Jenny Lind Island | File consists of the 2002 Site Investigation Implementation Plan for CAM-1 prepared by ESG and UMA Engineering for DCC in June 2002. The sections of the plan include background information, site description, objectives, scope, review of historical aerial photography, site investigation drawings, site surveys, geophysical surveys, landfill assessments, debris areas, proposed landfills and tier II disposal facility, proposed landfarms, hydrocarbon impacted areas, contaminated soil areas, demolition and structural materials assessment, background sampling, sampling plan summary, site specific requirements, archaeological resources, site investigation team, logistics, and health and safety. The appendices of the report include 1994 UMA drawings, landfill evaluation matrix of the main landfill, BCE CAM-1 data plot plan, demolition table, CAM-1 land use permit and water use license, and supplementary comments. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT. | 3241 | R112 | RG24 | 2021-00207-1 | 202 | 7690-DLCU001-F08637 | | DLC2-ENG | File contains materials prepared by engineering consultants for DLCU projects at CAM-2 and CAM-1. The file includes a spiral-bound October 2002 report by EBA Engineering on its geotechnical investigation of CAM-2 in 2001 and on its preliminary landfill designs. This report includes discussion, maps, drawings, and data regarding borrow areas, existing landfills, and proposed new landfills. The file also contains a spiral-bound December 2002 draft set of specifications for the cleanup at CAM-2, as well as a December 2002 package of draft tender drawings. In both case, handwritten annotations have been added to many pages, which are marked with sticky flags. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of Energy, Mines and Resources; Department of National Defence; EBA Engineering Consultants; Hatch Limited; SGE Group; UMA Engineering. | 2002/10/01-2008/05/16 |
| 3242 | R112 | RG24 | 2021-00207-1 | 202 | 7690-DLCU001-F08638 | | DLCCAM2-DRW | File contains drawings for the cleanup project at CAM-2. The file contains plot drawings 'showing additional information for clarification during cleanup of contaminated soil areas.' These drawings, found on seven oversize sheets, deal with the West Landfill, sewage outfall, module train, apron, garage, Airstrip North, Borrow Area #9, Old Camp Debris Area (OCDA), hangar, AL-Road, AL-Pad, Beach POL (petroleum, oils, and lubricants) area, and BS-Pad, showing various sampling locations, several categories of contaminated soil, and the coordinates of 'reference points' ('not surveyed'). Some of the sheets date from September 2003, and others are updated versions. The file also contains a map showing the PCB Storage Area, and the package of March 2003 tender drawings printed on 8x14 paper. Finally, the file contains a Shop Drawing/Submittal Tracking Report, which lists various deliverables or other documents required in the specifications, indicating the dates on which they were submitted and the DCC official who reviewed them. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; SGE Group; UMA Engineering. | 2003/03/03-2005/06/14 |

| 3243 | R112 | RG24 | 2021-00207-1 | 202 | 7690-DLCU001-F08641 | | DLCCAM2-PCB | File pertains to the Temporary PCB Storage Area established at CAM-2 during the cleanup project there. The file contains the Temporary PCB Storage Area Binder, as well as a variety of documentation related to the selection of a site for the storage area, the inspection of the storage area, and the contents of the specific containers stored there. The material includes colour and black-and-white photographic images. Also found in the file are information packages about general requirements pertaining to the storage area or to permits for CAM-2, as well as a memo discussing berm construction in the beach area and design modifications for the Station Landfill regrade area. Much of the material in the file is contained in three yellow subfolders. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; Environment Canada; Environmental Sciences Group / Royal Military College RMC; Kitnuna Projects Inc; North Warning System Office; SGE Group; UMA Engineering. | 2003/03/03-2005/09/15 |
| 3244 | R112 | RG24 | 2021-00207-1 | 202 | 7690-DLCU001-F08643 | | DLCCAM2-GEN | File contains a wide range of miscellaneous material pertaining to the DLCU project at CAM-2. One item in the file is the DCC Site Engineer's Final Field Report reviewing the 2003 season. The file also contains the 2005 signed letter of offer to the DCC Contract Coordinator, and material pertaining to the contractor's compliance with labour, safety, or environmental regulations. Other material in the file includes documents concerning the redesign and operation of the landfarm, wet-signature waivers of liability related to materials salvaged by the contractor, and various colour or black-and-white photographic images, including a copy of an aerial vertical photo from 1964. One Field Safety Inspection Report deals with a non-DLCU site, DND North Bay. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; Other - Non-DEW Line Site PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT. The report notes the soil, water, paint, and concrete sampling conducted, discusses the contamination found, identifies possible sites for landfill or landfarm construction, and provides recommendations about the approach to be taken in soil remediation, debris cleanup, and handling of demolition waste. The report also provides maps, colour photographic images, analytical data tables, and methodological information. Questions, annotations, or corrections have been handwritten on some pages of the report by a reviewer, and a May 2003 ESG memo inserted inside the front cover provides DCC with provisional corrections that were made to a subsequent version of the report in response to the reviewer's concerns. Also included with the present report is a July 2002 report by the DND-Nunavut Tunngavik Incorporated (NTI) Environmental Working Group (EWG), providing its recommendations about the landfills and hydrocarbon contaminated areas at CAM-2. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; FOX-M HALL BEACH - NUNAVUT. Included in this file are the minutes of meetings 3-5, 7, and 8 between Kitnuna and DCC, which discuss design elements for landfarm facilities, scheduling issues, communication strategies, demobilization progression, the environmental investigation, cleanup materials used at the site, equipment reporting, and PCB storage reporting. Also included in this file is a bundle of correspondence between DCC and Kitnuna discussing landfarm nutrient application, comments on site plans, geomembrane installations at the site, change requests, and contract information. There are also cross sections of landfarms, site plans, site technical drawings, and geospatial coordinate data of locations at the site. | Locations mentioned in the file include: CAM-3 SHEPHERD BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Kitnuna Projects Inc. | 2007/07/02- 2007/09/15 |
| 3357 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08942 | | DLC-3 - GEN - 8939 | File contains material related to meetings between DCC and Kitnuna Projects, correspondence, and field notes concerning the cleanup project at the CAM-3 site. Included in this file is an INAC inspection checklist for the commencement of a cleanup project, a cross section of a landfarm, borrow locations across the site, and follow-ups from ESG for the 2006 construction season at the site. Also included in this file is email correspondence discussing meeting minutes from conference calls. | Locations mentioned in the file include: CAM-3 SHEPHERD BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Indian and Northern Affairs Canada; Kitnuna Projects Inc. | 2006/06/24- 2007/10/12 |
| 3358 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08950 | | DLC4 - BEN | File pertains to the Minimum Inuit Employment Content (MIEC) for the CAM-4 DEW Line Site remediation project during the 2004 work season. The file includes DCC correspondence from February 2001 which provides the recommended MIEC (75.2%) and Minimum Inuit Content for Contracting (69.4%) for the remediation project at CAM-4. The file also contains copies of the interim annual Inuit benefits report (from September 21, 2003, to August 31, 2004) and of the monthly Inuit benefits update for August 2004, which both recorded lower than recommended MIEC percentages. The file concludes with correspondence (November 2004) from Kudlik Construction Ltd which provides an explanation for the MIEC percentage being below recommendation: a lack of diesel fuel in Kugaaruk forced the 2004 work season to end earlier than previously planned. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Kudlik Construction Limited. | 2001/02/23- 2004/11/26 |

| 3359 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08951 | | DLC4 - CLIP | File contains documents related to the shipment of hazardous waste from the CAM-4 DEW Line site to Montreal, to be treated and disposed of. The file includes a briefing note from July 2005, recommending that the removal of the PCB amended paint (PAP) and Hazardous Material should remain within the Transportation Contract, as well as correspondence from DCC (September 8, 2005) providing the conditions for the immediate shipping of the CAM-4 Hazmat waste. The file also contains correspondence (November 18, 1999) between the DLCU Project Manager and the Senior Administration Officer of Pelly Bay concerning the proposal to build a road to CAM-4. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Kudlik Construction Limited. | 1999/11/18-2005/09/08 |
| 3360 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08952 | | DLC4 - ENG | File contains engineering documents pertaining to the assessment and remediation of the CAM-4 DEW Line site. The file includes a copy of the October 1999 Pre-Construction Site Re-Visit Geotechnical Report prepared by EBA Engineering, which provides geotechnical design and environmental data. The file also includes documents prepared by UMA, such as a set of draft technical drawings of CAM-4, correspondence providing a list of the major changes to the Specifications, and multiple iterations of the Site Use Restrictions for CAM-4. The file contains site investigation documents, which record the 2004 Site Hydrocarbon Investigation and Upper and Lower site landfill investigations conducted by UMA. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; UMA Engineering. | 1999/10/07-2006/08/14 |

| 3362 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08955 | | DLC4 - PC | File contains risk evaluation documents reviewing the contractual risk involved in the CAM-4 DEW Line site remediation project. The file includes correspondence from UMA to DCC providing three tables on the risk associated with the cleanup of hydrocarbon contaminated soil at CAM-4. The file also includes DCC correspondence from 2003 to 2005 pertaining to the delay to the CAM-4 remediation project associated with the construction of an access road to CAM-4. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Indian and Northern Affairs Canada. | 1998/12/07-2001/03/08 |
| 3363 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08956 | | DLC4 - PCB | File contains a collection of records documenting the treatment of PCB material at the CAM-4 DEW Line site. The file includes updated documents (weekly checklists, PCB tracking sheets, inspection records, entry/exit logs, and PCB inventory lists) for the CAM-4 PCB Binder, as of September 14, 2003. The file also contains correspondence pertaining to the acquisition of CAM-4 land use permit 2000X0057 and FOX-5 land use permit 2000X0056. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 1995/11/07-2003/09/14 |
| 3364 | R112 | RG24 | 2021-00207-1 | 209 | 7690-DLCU001-F08961 | | DLC4 - PROP | File contains property documents related to the remediation of the CAM-4 DEW Line site. The file includes correspondence from DCC and DND concerning the construction of and payment for a road/bridge which would be used to access the CAM-4 site during its remediation phase. The project was initially granted to the Government of Nunavut, but since the Pelly Bay Community was unable to complete the construction in time for the start of the CAM-4 remediation project, the contractor for the CAM-4 cleanup, Kudlik Construction Ltd., completed the project using its own equipment and labour. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Government of Nunavut; Kudlik Construction Limited. | 2000/09/26-2006/08/11 |

The material dates from the period between October 2001 and May 2002. The file includes correspondence discussing schedule management for the CAM-4 cleanup project, the use of borrow areas, and the removal and handling of hazardous materials (PCB amended paint materials, and asbestos). The file also includes weekly and daily reports documenting the month of October 2001, and specific days (February 12 and 18 and April 2, 2002). The file also contains a collection of Kudlik Construction Ltd. work order documents, a copy of the May 2002 General Requirements report prepared by UMA pertaining to permits and licences for the CAM-4 project, and a copy of the MOU between DND and the Government of Nunavut concerning the construction, operation and maintenance of a summer road from the Hamlet of Kugaaruk to the CAM-4 Distant Early Warning Site. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. The documents date from the period between August and November 2004. The file contains correspondence about debris removal from Barrow Lake and about the management of the remediation schedule, and includes copies of the 2003 and 2004 schedules. The file also contains a collection of meeting minutes and daily and weekly reports documenting the remediation from August to the closure of the 2004 work season in September. In addition, the file includes ESG, Kudlik Construction Ltd., and DCC weekly reports as well as a daily report from Nunatta Environmental Services, documenting the personnel on site and the work activities completed from June 30 to August 27, 2004. Also found in the file are copies of the Upper Site Hydrocarbon Investigation Preliminary Report, as well as the end of season CAM-4 site report for 2004, which concluded with a section listing the Outstanding Issues which remain to be completed in the following remediation season. The file concludes with copies of the record of discussion from the 19 November 2004 meeting between DCC and Kudlik Construction Ltd., in which the two organizations reviewed the CAM-4 project and the concerns DCC has regarding the timely completion of the contract. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. The documents date from the period between December 2004 and August 2005. The file includes correspondence between DCC and Kudlik concerning design changes made to the CAM-4 remediation and to the management of the CAM-4 cleanup schedule, as well as correspondence between DCC and UMA pertaining to issues with the Kudlik contract and associated cleanup project. The file also contains weekly reports prepared by DCC, ESG, and Kudlik documenting the 2005 remediation activities, as well as a draft copy of a report pertaining to the Summary of Fill Quantities, Excavation Quantities and Capacities for Landfills at CAM-4 as of the End of 2004. While the ESG and Kudlik weekly reports document the start-up of the 2005 remediation season at the beginning of July 2005, the file includes DCC weekly reports from June 27 to August 20. The file also contains meeting materials (records of discussion, minutes, and agendas) for the pre-commencement meeting and site start-up meeting. Also found in the file are two Work Methodology Plan additions, prepared by Kudlik, pertaining to the completion of the upper site landfill excavation, and the in-situ landfarming at the upper site, as well as a copy of the ESG Implementation Plan for work at CAM-4 in 2005. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. The file deals with the period from August 2005 to August 2006. The file includes Kudlik weekly reports, DCC weekly reports, and meeting minutes documenting the remediation work at CAM-4 in the periods 28 August-17 September 2005, and 2-26 July 2006. In addition to weekly reports and meeting minutes, the file includes correspondence pertaining to the shipment of the CAM-4 hazardous material to Montreal, as well as correspondence from Kudlik Construction which provides an explanation for Kudlik's performance on various DLCU project (FOX-M, FOX-2, and most notably CAM-4). The file concludes with copies of the 18 August 2006 completed Record of Visual Inspection Declaration, which is accompanied by the Final Inspection Checklist, for the CAM-4 DEW Line site. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; Kudlik Construction Limited; UMA Engineering. | 2005/08/25- 2006/08/22 |
| 3398 | R112 | RG24 | 2021-00207-1 | 213 | 7690-DLCU001-F09040 | | 7 - DLC4 - 8950 - GEN | File contains a copy of the Site Report for the End of the 2003 Season, which provides a summary of the remediation work completed at CAM-4. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; Kudlik Construction Limited. | 2003/06/26- 2004/01/13 |

The documents date mainly from the period between January and June 2004. The file contains correspondence about the delays that have affected the CAM-4 remediation project, and includes copies of the 5 January 2004 Kudlik report presenting Kudlik's standpoint on the delays, and copies of the minutes from the 13 January 2004 meeting between DCC and Kudlik. The file also includes two iterations of the ESG 2004 Field Season Site Remediation Implementation Plan (from April 30 and May 17, 2004), as well as a copy of May 5 correspondence from UMA providing DCC with a summary report on CAM-4 site issues. The file concludes with a copy of the DCC weekly report for the week ending on 26 June 2004, documenting the first week of the 2004 remediation work season. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; Kudlik Construction Limited; UMA Engineering. | 2003/12/19- 2004/06/26 |

| 3420 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09394 | | 1999 - 2000 Summary Report - Hydrocarbon Spill Delineation & Free-Product Recovery - BAR-1 DEW Line Site - Komakuk Beach, Yukon Territory | File is 'wet' signed summary report from 1999 to 2000 for the hydrocarbon spill delineation and free product recovery for the BAR-1 site. Included in this file is the background to the remediation work at the site, an explanation of the soil and groundwater sampling programs, specifics in the free product recovery system design, the summary of the hydrocarbon recovery program at the site, and conclusions for hydrocarbon spill assessments and remediation at the site. Also included in this file are results for soil and water screening, technical flow charts of analytical results, overall site plans, and technical drawings of specific sampling locations. Appendices in this report are; the methodologies used for site assessments, test pit logs, analytical chemistry reports, operational monitoring data, vapour flow calculations, the operation and monitoring procedure, and photocopies of coloured photographs from the site remediation. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: SEACOR Environmental; UMA Engineering. | 2000/11/17- 2000/11/21 |
| 3421 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09395 | | Preliminary Quantitative Ecological Risk Assessment - BAR-1 Komakuk Beach, Yukon Territory | File is a bound report of the preliminary quantitative ecological risk assessment for the cleanup project to be completed at the BAR-1 site. This report seeks to quantify the risk associated with the hydrocarbon contamination found at the site, develop risk-based remediation criterion for hydrocarbons, and confirm the current remediation strategy. Included in this is the overall risk assessment approach, the site description, an explanation of environmental settings, receptor characterizations, exposure assessment models, potential adverse effects of hazardous materials exposure, risk probabilities, sensitivity and uncertainty analysis, and site-specific recommendations. Also included in this report are site maps and site technical drawings of sample locations. Appendices in this report are; a list of ecological species, a summary of chemical data for TPH, BTEX, and VOCs, receptor exposure factor data tables, sample calculations, an explanation of the NOAEL derivation method using EPA uncertainty factors, and model outputs for risk probability curves and correlation graphs. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Environmental Working Group Material; Inuvialuit Environmental Inc; Inuvialuit Settlement Region Review Committee; Parks Canada. | 2000/08/31 |

| 3422 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09396 | | Defence Construction Canada - BAR-1, Komakuk Beach Fuel Spill - Post-Remediation Monitoring Plan | File is a report on the post-remediation monitoring plan for the fuel spill that occurred at the BAR-1 site. Included in this file is a historical background of the site, remediation and design considerations, results from the ecological risk assessment, specifics on groundwater monitoring, a site inspection explanation, sampling methodologies, and a summary of sampling requirements. Also included in this file is a summary of accuracy for sampling, the visual inspection checklist, and guidelines for the interpretation of monitoring results. File also contains handwritten notes and comments throughout the report. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2001/11/30 |
| 3423 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09397 | | BAR-1 Komakuk Beach - Baseline Fuel Spill Monitoring Report | File is a baseline fuel spill monitoring report for the BAR-1 site, completed in May 2004. This report shows the site conditions, contaminant distribution, ecological risk assessment, and background of the site. The monitoring results from well vapours, chemical, water, and ground temperature samples are included. Also included in this file are the laboratory analysis reports, the visual inspection results, overall site plans, and technical drawings of the fuel spill area and sampling locations along the site. Email correspondence forwarding this report and a briefing note discussing this report can be found at the start of the report. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; UMA Engineering. | 2004/05/13 |
| 3424 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09399 | | The Collection of Landfill Monitoring Data for DEW Line Sites - BAR-1 Komakuk Beach, YK - Final Report | File is a final 'wet' signed bound report concerning the collection of landfill monitoring data for the former BAR-1 site, specifically at the Station Area Landfill and the Former Fuel Spill Area. The report shows the context and mandate of the long-term monitoring project, the objectives and scope of work, an overall site plan, visual inspection methodologies, soil and groundwater sampling methodologies, and thermal monitoring techniques. For both the Station Area Landfill and the Former Fuel Spill Area the report includes a summary of the sites, inspection checklists, the results from the visual inspection, results from the preliminary stability assessment, technical drawings of the location plans, thermal monitoring data results, results from soil and groundwater sampling, and photocopies of site photographs. Appendices include certificates of analysis from soil and water sampling, independence lab analysis results, quality assurance analytical results, and photocopies of handwritten field notes. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Franz Environmental Incorporated. | 2010/11/18 |

| 3433 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09412 | | BAR-2 Shingle Point - Baseline Landfill Monitoring Report | File is a baseline landfill monitoring report of soil and groundwater sampling and final construction inspections for the monitoring phase of the BAR-2 site. This report includes a background to the site, a description of biophysical environment, the monitoring schedule, sampling methodologies, a summary of landfill monitoring installations, results of analytical soil data, groundwater sampling results, and the overall site plan. Specifics on the location, history, contamination sources, technical drawings, site plans, landfill visual assessment forms, thermal monitoring summary, and site photographs are included for the USAF, NWS, Ravine, and Station Landfills. The appendix in this file is the report from UMA on the BAR-2 Landfill Monitoring Year 1 Summary which shows the monitoring results from the four landfills mentioned above, the development of monitoring wells at these sites, site photographs, technical drawings, and analytical results. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON. Organizations mentioned in the file include: EBA Engineering Consultants; UMA Engineering. | 2003/03/14 |
| 3434 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09414 | | 2003 Landfill Monitoring Final Report - BAR-2 PCB Packing Area | File is a bound final 'wet' signed report from the long-term monitoring phase regarding the subsurface sampling from a location near the beach area that was previously used for PCB and PAP materials at the BAR-2 site. This report shows the methodologies used for sampling, analytical data for soils collected, a technical drawing of sampling locations, and the laboratory results of sampling completed at the site. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; IEG Environmental Consultants Limited. | 2004/01/31 |
| 3435 | R112 | RG24 | 2021-00207-1 | 215 | 7690-DLCU001-F09416 | | 2003 Landfill Monitoring Final Report - BAR-2 Shingle Point | File is a bound final report on the collection of landfill monitoring data for the BAR-2 site long-term monitoring phase. This report shows the background to the DEW Line project, specifics on the 2003 monitoring program, soil and groundwater sampling methodologies, quality control procedures, and the monitoring sampling results for the former fuel spill area and the USAF, NWS, Ravine, and Station Area Landfills at the site. The appendices in this report include: inspection checklists, groundwater and soil sample results, the overall site plans; and site technical drawings for the four landfills mentioned above, specifics on monitoring well development, site photographs, analytical lab results from monitoring work, and printouts of handwritten field notes. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; IEG Environmental Consultants Limited. | 2004/01/31 |

The report includes new or revised sections, dated 14 March 2005, which deal with baseline monitoring at the Abandoned Camp Landfill and discuss the methods, framework, and core information for baseline monitoring at PIN-M as a whole. Sections of the report dating from 2002 provide baseline data for the Station Area Landfill and Extension, Main Landfill - West, Main Landfill - East, and West Point Landfill. An appendix provides a lengthy summary of landfill monitoring at PIN-M in Year 1 (1999). The report includes maps and data tables for the various specific landfills, and the appendix also includes visual assessment checklists, monitoring well reports, colour photographic images, quality assurance/quality control data pertaining to landfill monitoring at six DLCU sites in 1999 or 2000, and the minutes of a 24 January 2001 meeting of the Environmental Working Group (EWG). | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3454 | R112 | RG24 | 2021-00207-1 | 217 | 7690-DLCU001-F09449 | | PIN-M Cape Parry - Landfill Monitoring Summary - 1999 | File consists of a bound report by UMA Engineering summarizing the landfill monitoring carried out at PIN-M in 1999. Handwriting on the front page says 'Superceded by revised report dated March 14, 2005.' The present report provides background information for the monitoring program at PIN-M, and provides specific data about five landfills: Station Area Landfill and Extension, Main Landfill - West, Main Landfill - East, West Point Landfill, and West Landfill. For each landfill, the report comments on baseline data and on the monitoring conducted in 1999, and provides a data table, a visual assessment checklist, a map (except for West Landfill), and colour photographic images. An appendix supplies quality assurance/quality control data pertaining to landfill monitoring at six DLCU sites in 1999. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3455 | R112 | RG24 | 2021-00207-1 | 217 | 7690-DLCU001-F09457 | | 2004 Landfill Monitoring Report - PIN-1 Clinton Point | File consists of a bound report by IEG Environmental on the landfill monitoring carried out at PIN-1 in 2004, particularly during a site visit on 10-12 September. The report contains visual inspection checklists, maps, and colour photographic images for six landfills: Station Area Landfill - Northwest, Station Area Landfill - Southwest, Non-Hazardous Waste Landfill, Beach Landfill - South, Beach Landfill, and Beach Landfill - North. The report also deals with groundwater, soil, and thermal monitoring at Beach Landfill - North, and includes data tables, monitoring well records, field checklists for vertical thermistors, and thermal data graphs. Appendices contain field notes and laboratory documentation. A few additional documents are included at the front of the bound package, inside the front page: the 2004 Landfill Monitoring General Report by IEG (which provides methodological information on the monitoring of four DLCU sites), the minutes of a 2 May 2005 Environmental Working Group (EWG) teleconference, and an EWG Summary of Recommendations pertaining to PIN-1. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; PIN-1 CLINTON POINT - NWT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Enviro Test Laboratories; Environmental Working Group Material; IEG Environmental Consultants Limited; Inuvialuit Land Administration; WESA. | 2005/03/01- 2005/05/02 |

The report presents results of visual inspection and soil sampling, providing visual inspection checklists, maps, soil data, and colour photographic thumbnail images for each of six landfills (Station Area Landfill - Northwest, Non-Hazardous Waste Landfill, Station Area Landfill - Southwest, Beach Landfill - South, Beach Landfill, and Beach Landfill - North). The report also contains groundwater sampling data and monitoring well records for the Non-Hazardous Waste Landfill and the Beach Landfill - North, as well as thermal material for the latter landfill, including thermal data graphs and field checklists for the vertical themistors. Appendices contain field notes and laboratory documentation. A table inserted inside the front page provides comments by DCC reviewers on an earlier version of the report, and handwritten notations on the table indicate which deficiencies had or hadn't been rectified. | Locations mentioned in the file include: PIN-1 CLINTON POINT - NWT. Report presents a summary of the baseline assessment work carried out at PIN-4 and includes site investigation information, as well as sample analytical data collected during the environmental cleanup. Report provides an overview of the site biophysical environmental, traditional land use activities, site background conditions, the landfill monitoring methodology, and the basis for evaluation of monitoring results. Report contains sections on: northwest landfill, north landfill, non-hazardous waste landfill, station area landfill west, USAF closure landfill, Tier II disposal facility, and airstrip landfill. | Locations mentioned in the file include: PIN-4 BYRON BAY - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other. | 2014/03/27 |
| 3471 | R112 | RG24 | 2021-00207-1 | 219 | 7690-DLCU001-F09513 | | CAM-M Landfill Monitoring - Inspections Report | File consists of a bound report by EBA Engineering Consultants on visual and thermal landfill monitoring carried out at CAM-M in the summer of 2000, during the final season of the remediation work at the site. The report provides visual inspection checklists and maps for each of six landfills (North Main Landfill, South Main Landfill, South Shore Landfill, West Landfill, Airstrip Landfill, and Tier II Soil Disposal Facility), as well as thermal monitoring summaries for the North Main Landfill, South Main Landfill, and Tier II Facility. The report includes cross section drawings, thermal data graphs, colour photographic images, and thermistor installation information, including calibration certificates and information about the dataloggers. Tucked inside the front cover is a separate visual inspection checklist from a 25 August 2000 UMA inspection of the South Main Landfill. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EBA Engineering Consultants; Lakewood Systems Limited; UMA Engineering. | 2000/08/25- 2000/12/12 |

| 3472 | R112 | RG24 | 2021-00207-1 | 219 | 7690-DLCU001-F09514 | | CAM-M Cambridge Bay - Landfill Monitoring Baseline | File consists of a bound report on the baseline monitoring carried out at CAM-M (including baseline data collection in 1989, 1990, 1999, and 2000), along with an appendix on the landfill monitoring in year 1 (2001). The report discusses the monitoring framework and methodology, supplies background soil data for CAM-M, and provides baseline data for six landfills (Main Landfill North, Main Landfill South, South Shore Landfill, West Landfill, Airstrip Landfill, and Tier II Soil Disposal Facility), each of which is also dealt with in the appendix on year 1 monitoring. The report and appendix contain drawings, soil data, visual inspection checklists, and black-and-white photocopies of photographic images for each landfill, as well as groundwater data, monitoring well records, Thermal Monitoring Summaries, and thermal data graphs for the Main Landfill North, Main Landfill South, and Tier II Facility. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: EBA Engineering Consultants; Environmental Sciences Group / Royal Military College RMC; UMA Engineering. | 2003/04/30 |

The report comments on the visual inspection conducted at each of six landfills (Main Landfill North, Main Landfill South, South Shore Landfill, West Landfill, Airstrip Landfill, and Tier II Disposal Facility), and on the soil, groundwater, and thermal monitoring carried out for the Main Landfill North, Main Landfill South, and Tier II Facility. Appendices contain visual inspection checklists, monitoring well records, test pit logs, soil and groundwater data tables, laboratory documentation, thermistor data tables, thermistor graphs for 1999-2001 and 2001-2002, and colour photographic images. The report contains a few handwritten markings by a reviewer, with flags pointing to a few of the spots in question. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Gartner Lee Limited; Nunasi Environmental Corporation; Royal Military College of Canada. | 2003/02/01-2003/02/28 |

| 3474 | R112 | RG24 | 2021-00207-1 | 219 | 7690-DLCU001-F09516 | | The Collection of Landfill Monitoring Data at the CAM-M Cambridge Bay Site - Report 2003 | File consists of a bound report by Gartner Lee and Nunasi Environmental Corporation on the landfill monitoring carried out at CAM-M in 2003, particularly during a site visit on 6-8 August. The report comments on the visual inspection and soil sampling conducted at each of six landfills (Main Landfill North, Main Landfill South, South Shore Landfill, West Landfill, Airstrip Landfill, and Tier II Disposal Facility), and on the groundwater and thermal monitoring carried out for the Main Landfill North, Main Landfill South, and Tier II Facility. Surface water sampling at one location is discussed as well. The report and/or its appendices contain maps, soil and groundwater data tables, visual inspection checklists, monitoring well records, test pit logs, laboratory documentation, thermistor data tables, thermistor graphs for 1999-2001, 2001-2002, and 2002-2003, and colour photographic images. | Locations mentioned in the file include: CAM-M CAMBRIDGE BAY - NUNAVUT. The report was prepared in February 2012 by Biogenie, a division of the EnGlobe Corporation, and was received by DCC on February 23, 2012. The report includes an overview of the methodology employed (visual inspection, soil and groundwater sampling, thermal monitoring, and the QA/QC procedures), and provides the landfill monitoring data (Preliminary Stability Assessments, Photographic Records, and the steps previously mentioned in the methodology) for the seven landfill areas located at CAM-3: the Beach Landfill, the Non-Hazardous Waste Landfill, the Station Landfill, the Tier II Disposal Facility, the Northeast Landfill, the USAF Landfill, and the NWS Landfill. The report also includes a Quality Assurance/Quality Control section, as well as three appendices, which provide additional information about the landfill monitoring program: Range of the Report and Limitation of Responsibility, scanned copies of the Field Notes, and the Maxxam and Exova QA/QC Report and Certificates of Analysis. | Locations mentioned in the file include: CAM-3 SHEPHERD BAY - NUNAVUT. Organizations mentioned in the file include: Biogenie SRDC Incorporated; Defence Construction Canada Ltd Other; EnGlobe Corporation Quebec. | 2012/02/01- 2012/02/23 |

The report shows the context and mandate of the monitoring project, an overall site plan, and methodologies for visual inspections, soil sampling, groundwater sampling, thermal monitoring, and monitoring well developing procedures. Specifically, for the East and West Helipad Landfills, the Barrel Dump Landfill, the Station Area Landfill, the Lower Site Landfill & DCC Tier II Soil Disposal Area, the Airstrip Landfill, and the Tanner Bay Landfill at BAR-4 the report includes site summaries, the visual inspection report, a preliminary stability assessment, the location plans, technical drawings of sampling locations, photocopies of site photographs, thermal monitoring data, soil sample analytical data, groundwater sample analytical data, groundwater data, and sampling logs from the monitoring wells at each of these 6 Landfills at BAR-4. The appendices in this report include certificates of analysis, the results from independent laboratory analysis, quality control results, and photocopies of handwritten fieldnotes from the site monitoring work completed. | Locations mentioned in the file include: FOX-4 CAPE HOOPER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; Nunatta Environmental Services. | 2007/12/31 |

| 3557 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10103 | | Record 7626 - Claudia David - DEW Line Clean Up Project - DND-IRC Review Committee Meeting - Conference Call - 1500 Hrs - Tuesday, 11 May 2005 | File consists of a bound package of materials related to the DND-Inuvialuit Regional Corporation (IRC) Review Committee teleconference on 11 May 2005. The package contains minutes of the 6 February 2004 DND-IRC meeting, as well as emails from an official in the Inuvialuit Land Administration on 12 May 2005 dissenting from a certain landfill monitoring decision made in the previous day's DND-IRC teleconference. The package also contains supporting documentation, organized by tab, pertaining to various issues that were to be discussed at the 11 May 2005 meeting. Some of the key materials include documents about additional debris at PIN-M, legal advice about DND's obligations with regard to some of this debris, and a DND presentation for an 8 February 2005 meeting with Environment Canada. The file also contains minutes of teleconferences held by the Environmental Working Group (EWG) for the Inuvialuit Settlement Region (ISR), and associated EWG Summary of Recommendations documents. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3560 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10140 | | Thermal Monitoring Annual Data Analysis | File consists of Thermal Monitoring Annual Data Analysis reports for the DLCU project, held together with a black clamp, without any file folder. Each report was completed by EBA in March 2009, and pertains to a particular landfill at a DLCU site, providing data up until mid-2008. The reports provide data and/or discussion regarding the ground temperature, active layer, thawing index, and freezing index, and include maps, thermistor data graphs, and Thermistor Annual Maintenance Reports. | Locations mentioned in the file include: CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; Franz Environmental Incorporated; Gartner Lee Limited; Nunatta Environmental Services; SGE Acres Limited; Sila Remediation Inc.; UMA Engineering. | 2009/03/31- 2009/03/31 |
| 3561 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10141 | | DEW Line Thermal Database | File pertains to climate change and thermal issues associated with the DLCU project. The file includes a March 2006 report prepared by EBA Engineering for UMA, entitled 'Impacts of Climate Change on the DLCU Containment Facilities.' Also included in the file is a 12 March 2008 cover memo that transmitted both the hard copies of 'the annual reports' and a CD containing the DEW Line Thermal Database (neither the reports nor the CD are found in the file). The memo indicates how to install the database program on one's computer. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; EBA Engineering Consultants; UMA Engineering. | 2006/03/17- 2008/03/12 |
| 3562 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10142 | | Layfield Environmental Solutions with Geosynthetics - QA/QC - S.N.C Lavalin - Tier 2 Upper Site | File consists of a spiral-bound quality assurance/quality control package pertaining to the installation of geomembrane by Layfield Environmental Systems at DYE-M in August and September 2007, both in the Upper Site Tier II Facility and at the tank farm. The package contains drawings, certificates of inspection and acceptance, a one-year installation warranty, and various logs from the process of installing, testing, and repairing the geomembrane. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Layfield Geosynthetics; SNC-Lavalin Incorporated. | 2007/10/15 |

| 3563 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10153 | | Thermal Monitoring Annual Data Analysis | File consists of Thermal Monitoring Annual Data Analysis reports for the DLCU project, organized with tabs and held together with a black clamp, without any file folder. Each report was completed by EBA in early 2009, and pertains to a particular landfill or location at a DLCU site. The reports provide data and/or discussion regarding the ground temperature, active layer, thawing index, and freezing index, and include maps and thermistor data graphs. A report for FOX-4 includes data from up to mid-2008, and many of the reports include data from up to mid-2007, but some include only less recent data. Some reports discuss malfunctions or maintenance issues with thermistors or data loggers, and a few of the reports for BAR-2 or CAM-M contain cross section drawings showing inclined thermistors. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-4 NICHOLSON PENINSULA - NWT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. | 3564 | R112 | RG24 | 2021-00207-1 | 225 | 7690-DLCU001-F10159 | | DEW Line Clean Up Project - Quality Assurance Review of Landfill Designs | File consists of a copy of a March 2008 report by UMA/AECOM and EBA entitled 'Quality Assurance Review of Landfill Designs.' The document is unbound, held together with a black clamp, without any file folder. The report assesses landfills constructed, enhanced, or planned as part of the DLCU project, especially 25 landfills identified as presenting possible concerns. In addition to discussing design issues, landfill monitoring carried out, and the effects of climate change, the report presents a number of recommendations, including several regarding nine particular landfills. Appendices include a more comprehensive list of DLCU landfills, as well as a copy of a March 2006 EBA report entitled 'Impacts of Climate Change on the DLCU Containment Facilities.' | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3583 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10281 | | DLD-M - QA | File contains quality assurance and lessons learned material concerning the fuel tank farm cleanup project at the DYE-M site. Included in this file are lessons learned from DCC that discuss recommendations, the quality assurance action list for the site, an excerpt from an EBA report on future Fuel Tank Farm Work, a summary from UMA on lessons learned, the terms of reference for the quality control plan, and correspondence concerning the quality control plan. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: ATCO Frontec Corporation; Defence Construction Canada Ltd Other; EBA Engineering Consultants; SNC-Lavalin Incorporated; UMA Engineering. | 1999/12/08-2000/09/11 |
| 3584 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10282 | | DLD-M - PROP | File contains correspondence concerning Borrow Area 4 at the DYE-M site that discusses obtaining and maintain all the permits required and comments on the remediation at Borrow Area 4 at the site. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Justice Canada; Department of National Defence. | 2004/04/20-2004/07/05 |
| 3585 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10285 | | DLD-M - PC | File contains email correspondence discussing the media request and summarizes a historical report on ocean disposal for the remediation at the DYE-M site. Also included in this file is a pamphlet from SNC-Lavalin concerning employment opportunities at the DYE-M site for the cleanup project. This pamphlet is written in both English and Inuktitut. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; SNC-Lavalin Incorporated. | 2005/04/04-2005/07/06 |
| 3586 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10287 | | DLD-M - ENV | File focuses on environmental concerns associated with the DYE-M DEW Line site cleanup project. File contains: email correspondence regarding a pipeline break, CEPA soil at the site, on-site environmental expertise, due diligence work, PCBs at the site, and environmental screenings on the site. File also contains: a backgrounder on the main fuel line break, revised inspector's directions, site photographs of work completed, a copy of the environmental screening report for the cleanup of the fuel tank farm at the site, overall site plans, technical drawings of the fuel tank farm, a list of cumulative environmental effects, a supplementary delineation report for the Beach Fuel Tank, cost estimates for the design concepts of remediation work at the site, and correspondence on bear monitors for the site. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of Fisheries and Oceans Canada; Environment Canada; Environmental Sciences Group / Royal Military College RMC; SNC-Lavalin Incorporated; UMA Engineering. | 1997/08/27-2006/07/21 |

| 3587 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10288 | | DL - ENV | File is a wallet that contains a bound final 'wet' signed report of the assessment of remedial options for hydrocarbon contaminated soil at the DYE-M DEW Line site. Report details the preliminary assessment of the environmental risk factors associated with hydrocarbon contaminated soils. Report includes sections on: site introduction, the regulatory context for project agreements, the assessment process of contamination, and a description of the areas of concern at the Beach Area, the Lower Site, Middle Pumphouse Area, and the Upper site. Also included in this file is an assessment of the remediation approaches, estimated contaminated areas, site plans, site maps, and technical drawings of the site. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Environmental Sciences Group / Royal Military College RMC; SGE Group; UMA Engineering. | 2002/04/30 |
| 3588 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10289 | | DLD-M - ENG | File is a wallet that contains 3 bound reports concerning the specifications and the preliminary design report for the environmental cleanup project at the DYE-M site. There is a copy of the tender specifications (dated June 2002) and one copy (dated May 2002) for the short-term environmental cleanup measures for the site and shows project requirements, environmental projection measures, hazardous waste removal, site technical drawings, site maps, and the environmental protection plan. The second report is the preliminary design report (dated October 2003) that shows landfill remedial options, remediation of other areas, design strategies for hydrocarbon contaminated soils, overall site plans, detailed landfill evaluation, remediation options, and a hydrocarbon soil review, and a submission by ALTEC Technology Systems. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; Department of National Defence; SGE Group; UMA Engineering. | 2002/05/01- 2003/10/31 |
| 3589 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10290 | | Department of National Defence - Cleanup of CAM-4 Pelly Bay, Nunavut - DEW Line Site - Preliminary Comments on Kudlik's Responses to DCC's Questions of June 12, 2007 | File consists of a spiral-bound report by Cogerec Consultants pertaining to a claim by Kudlik Construction for additional compensation for the cleanup project Kudlik completed at CAM-4. The report, which Cogerec prepared at the request of DCC's legal counsel, provides preliminary comments on the responses Kudlik had provided to a set of questions from DCC about the claim. Key issues discussed in the report include the quantities and types of fill material available in borrow sources, and difficulties related to the Minimum Inuit Employment Content (MIEC) requirements and Inuit employees' initial inexperience in certain types of heavy equipment operation. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: COGEREC Consultants Limited; Defence Construction Canada Ltd Other; Department of National Defence; Kudlik Construction Limited. | 2007/11/06 |

| 3590 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10294 | | Department of National Defence - Cleanup of CAM-4 Pelly Bay, Nunavut - DEW Line Site - Preliminary Report Regarding Kudlik's Claim | File consists of a spiral-bound preliminary report by Cogerec Consultants regarding a claim by Kudlik Construction for additional compensation for the cleanup contract it had completed for DCC at CAM-4. The report was prepared by Cogerec at the request of DCC's legal counsel. Key issues discussed in the report include alleged discrepancies between the actual condition of the borrow areas and the information DCC provided about them, as well as the poor condition of the road to access the site and the lack of availability of fuel. Tucked inside the report is an agenda for a 13 Jun 2007 meeting between DCC and Kudlik, and a list of 23 questions for Kudlik to answer regarding its claim. | Locations mentioned in the file include: CAM-4 PELLY BAY - NUNAVUT. Organizations mentioned in the file include: COGEREC Consultants Limited; Defence Construction Canada Ltd Other; Department of National Defence; EBA Engineering Consultants; Kudlik Construction Limited; UMA Engineering. | 2007/05/03- 2007/06/12 |
| 3591 | R112 | RG24 | 2021-00207-1 | 226 | 7690-DLCU001-F10295 | | DLCU Planning Committee Milestone Summary's - PlanO Copy | File consists of a file pertaining to project-wide planning for the DLCU project and Long Term Monitoring Program. The file contains Milestone Summary tables for the 2009-10, 2010-11, and 2011-12 fiscal years, at least some of which were based on Planning Committee teleconferences, and which deal with tasks pertaining to monitoring contracts, site-specific remediation, and overall project management. The file also contains a 2010 Responsibility Assignment Matrix (RAM) Tasks List, DLCU Long Term Program spreadsheets, and program planning documents pertaining to the 2011-12 and 2012-13 fiscal years. (A few of the latter documents pertain to PIN-2 and mention contract 41593, which has not been listed in the Contract field.) A few documents make very brief reference to the planned overland demobilization from FOX-3 to a non-DLCU site, FOX-CA, and the planned demobilization of hazardous materials from FOX-CA to Montreal. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; Other - Non-DEW Line Site PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC. | 2009/10/15- 2012/09/01 |

The majority of the file pertains to the West Kitikmeot Regional Land Use Plan, the public meetings that the Nunavut Planning Commission was to hold about the plan in early 2002, and the DLCU presentation that was to be made at the meetings. The file includes a copy of the revised draft plan, a large background report, and transcripts of hearings about the plan which had been held back in June 1998. Email in the file also discusses plans for visits to the arctic, either for community meetings or for tours of DEW Line sites. Other material includes email mentioning a DND legal opinion about the aforementioned land use plan, email about the PMO's position on investigation of PCB contamination, and an employment report listing Inuit and non-Inuit workers at CAM-4 for 21 September-3 November 2001. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3797 | R112 | RG24 | 2021-00207-1 | 242 | 7690-DLCU001-F10654 | | DEW Line - Jenny Lind Island - CAM-1 - 0171-120 - Inspection Reports - UMA 5.7 | AECOM/UMA file containing site reports and other material about the remediation carried out at CAM-1 in 2008 and 2009. The file contains weekly UMA site reports on the CAM-1 project in 2008, which outline the earthwork, cleanup, and survey work conducted, and discuss the results of on-site geotechnical quality control performed. The file also contains survey data, test pit logs, information on monitoring wells, hydrocarbon sampling data tables, correspondence about hydrocarbon cleanup measures, and an inspection report on the Temporary PCB Storage Facility. Also found in the file is a March 2005 Environmental Working Group (EWG) Record of Recommendations report on CAM-1 landfills and hydrocarbon contaminated areas, and minutes of an EWG teleconference. A few documents contain passing references to two non-DLCU sites, CAM-1A and FOX-C. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; Other - Non-DEW Line Site. | 3798 | R112 | RG24 | 2021-00207-1 | 242 | 7690-DLCU001-F10655 | | Matrix | File pertains to risk evaluation matrices used for assessing landfills and the monitoring process in the DLCU project. The file contains a copy of the fourth edition of the Environmental Working Group (EWG) Report, dated November 2003, as well as a 2003 copy of the proposed risk evaluation matrix to be used at that time for landfills in the Nunavut region. The file also deals with a new risk evaluation matrix developed in 2013, to incorporate the risk of landfill failure. The materials include draft minutes of the 27 February 2013 meeting of the Landfill Monitoring Technical Working Group (LFMTWG); marked-up December 2013 and March 2014 versions of the explanatory paper titled 'DLCU Monitored Landfills - Risk Evaluation Matrix'; and completed copies of the new evaluation matrix for the monitored landfills at each of the 21 DLCU sites (with handwritten annotations). Finally, the file contains a discussion paper (with handwritten marginalia) titled 'DLCU LTM Process.' | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. | 3799 | R112 | RG24 | 2021-00207-1 | 242 | 7690-DLCU001-F10656 | | Nunavut Baffin Region - 2014 DEW Line Landfill Monitoring Program - FOX-M Hall Beach - Final Monitoring Report | File consists of a paper copy of the Final Monitoring Report for the FOX-M 2014 DEW Line Landfill Monitoring Program. The report was prepared by SENES Consultants in February 2015, and was received by Public Works and Government Services Canada, on behalf of DND, in March 26, 2015. This report correlates to the Year 7 Monitoring Event, which is part of the Phase II Monitoring Program. The report includes an overview of the general approach and methodology of the monitoring program (visual inspection, soil and groundwater sampling, thermal monitoring, and QA/QC), as well as a landfill summary of the eight landfill areas located at the FOX-M DEW Line Site: the Non-Hazardous Waste Landfill, the G217-West Landfill, the Billboards Landfill, the HAZMAT Storage-East Landfill, the Communications North Landfill, the Communications Northwest Landfill, the Tier II Disposal Facility, and the East Beach Landfill. The landfill summaries provide an overview of the work conducted at the landfill locations, the results of the monitoring program, and concludes with the overall performance of the landfill and recommendations for the future monitoring phases. The report additionally includes a collection of printed photographic material (printed copies of photos depicting the monitoring program, and photograph records), as well as eight appendices providing additional information about the report and the monitoring program: the Range of Report and Limitation of Responsibilities, copies of the Field Notes, the Laboratory QA/QC Reports and Certificates Analysis, the Thermistor Reports, and the soil and ground water Historical Chemistry Summary Table and Chemical Concentration Trend Graphs. | Locations mentioned in the file include: FOX-M HALL BEACH - NUNAVUT. Organizations mentioned in the file include: Arcadis Canada Inc; Department of National Defence; Public Works and Government Services Canada; Senes Consultants. | 2015/02/01- 2015/03/26 |

The report was prepared by SENES Consultants in February 2015, for the benefit of DND. The report includes an overview of the approach and methodology employed during the monitoring program, as well as summaries of the 2014 monitoring program for the three landfill areas located at the FOX-5 DEW Line Site: the Station Non-Hazardous Waste Landfill, the Main Landfill, and the Middle Site Non-Hazardous Waste Landfill/Tier II Soil Disposal Facility. The landfill monitoring summaries include a description of the work conducted at the landfill locations, the results of the 2014 monitoring program (which consists of visual inspections, soil and groundwater sampling, and thermal monitoring). The landfill summaries conclude with recommendations for the later phases of the long-term monitoring project, as well as an overall performance evaluation of the landfill locations. The report additionally includes 8 appendices: the Range of the Report and Limitation of Responsibilities, the field notes, the Laboratory QA/QC Reports and Certificates of Analysis, the Thermistor Reports, as well as the soil and groundwater Historical Chemistry Summary Tables and Chemical Concentration Trend Graph. | Locations mentioned in the file include: FOX-5 BROUGHTON ISLAND - NUNAVUT. The report shows monitoring results for 5 landfills at the site: The Non-Hazardous Waste Landfill and Tier II Disposal Facility, Helipad West Landfill, Station Area Landfill, Pallet Line Landfill, and Tanner Bay Landfill. Included in this report is a general background to the study, an overall site plan, site descriptions, and a general methodology on the summary for sampling, visual inspections, and monitoring. The results section of each of the 5 landfills include: a description of the landfill, visual inspection results, soil sampling results, groundwater sampling results, technical drawings of sampling locations at the site, site photographs, monitoring well sampling records, and thermistor maintenance reports. The appendices in this report is a limitation report, thermistor inspection reports, visual inspection reports, certificates of analysis, quality assurance reports, and historical chemistry summary tables for soil and groundwater contents. | Locations mentioned in the file include: FOX-4 CAPE HOOPER - NUNAVUT. Organizations mentioned in the file include: Public Works and Government Services Canada; Senes Consultants. | 2015/03/31- 2015/03/31 |

The report was prepared in April 2015 by Biogenie, a division of the EnGlobe Corporation, and was received by DCC on May 7, 2015. The report includes an overview of the methodology employed during the Landfill Monitoring Program (visual inspection, soil and groundwater sampling, thermal monitoring, and the QA/QC procedures), as well as provides the landfill monitoring data (Preliminary Stability Assessments, Photographic Records, and the steps previously mentioned in the methodology) for the seven landfill areas located at the CAM-3 DEW Line Site: the Beach Landfill, the Non-Hazardous Waste Landfill, the Station Landfill, the Tier II Disposal Facility, the Northeast Landfill, the USAF Landfill, and the NWS Landfill. The report also includes three appendices, which provides additional information about the landfill monitoring program: copies of the Laboratory Results, the QA/QC Discussion, and scanned copies of the Field Notes and Chain of Custody Forms. | Locations mentioned in the file include: CAM-3 SHEPHERD BAY - NUNAVUT. Organizations mentioned in the file include: Biogenie SRDC Incorporated; Defence Construction Canada Ltd Other; EnGlobe Corporation Quebec. | 2015/04/01- 2015/05/07 |
| 3807 | R112 | RG24 | 2021-00207-1 | 243 | 7690-DLCU001-F10664 | | Hazardous Waste Disposal | File contains documentation pertaining to the transportation and disposal of hazardous waste from DLCU sites. The documents are held together with a green clamp, without any file folder. The material includes a tracking table listing various types of transportation or disposal documentation received for specific quantities of waste that had been shipped. The file also contains Certificates of Destruction, Letters of Disposal, and similar documentation. | Locations mentioned in the file include: CAM-2 GLADMAN POINT- NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT. | 3810 | R112 | RG24 | 2021-00207-1 | 243 | 7690-DLCU001-F10667 | | The Collection of Landfill Monitoring Data at the Former CAM-1 DEW Line Site - Jenny Lind Island, Nunavut - Final Report - 2014 | File consists of a paper copy of the final report of the 2014 Collection of Landfill Monitoring Data from the former CAM-1 DEW Line Site, prepared by Biogenie (a division of EnGlobe Corporation) in June 2015 for DCC. The report provides landfill monitoring data for the ten landfill areas of the CAM-1 DEW Line Site: Borrow Area North Landfill, Northeast Landfill, Station West Landfill, Non-Hazardous Waste Landfill, Tier II Disposal Facility, Southeast Landfill, Station East Landfill, Main Landfill, USAF Landfill, and East Landing Landfill. The report includes a description of the visual inspections of the landfills (with checklists, technical drawings and photographic records of the monitoring program), as well as summaries of soil and groundwater analytical data and thermal monitoring summaries (for the landfill locations which underwent these analysis). The report also includes three annexes which provides additional information about the monitoring program and the QA/QC process; the Laboratory Results, the QA/QC Discussion, and the Field Notes and Chain of Custody Documents. | Locations mentioned in the file include: CAM-1 JENNY LIND ISLAND - NUNAVUT. | 3815 | R112 | RG24 | 2021-00207-1 | 243 | 7690-DLCU001-F10672 | | FOX-4 and FOX-5 General | File pertains to work carried out at FOX-4 and problems with thermistors and/or dataloggers at FOX-4 and FOX-5. The file consists of correspondence and reports held together with a black clamp, without any file folder. In addition to correspondence about malfunctioning dataloggers, the file contains a letter from AECOM providing amendments to the 2013 Geotechnical Quality Assurance Summary for FOX-4. Also found in the file is a Site Summary Report by ESG, which discusses work carried out at FOX-4 in 2013, such as confirmatory sampling, stockpile sampling, and testing of drinking water and wastewater. | Locations mentioned in the file include: FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Senes Consultants. | 2013/11/01-2015/11/03 |
| 3816 | R112 | RG24 | 2021-00207-1 | 243 | 7690-DLCU001-F10673 | | FOX-4 Tier II Thermistors | File pertains to problems with the thermistors in the Tier II landfill facility at FOX-4, and to DND concerns about inadequacies in work performed by AECOM for the FOX-4 and DYE-M projects. The file consists of correspondence held together with a black clamp, without any file folder. In addition to email, the file contains a letter from AECOM providing amendments to the 2013 Geotechnical Quality Assurance Summary for FOX-4, including updated thermistor installation reports, a map of the Airstrip Area, and a drawing of the Non-Hazardous Waste Landfill and the Tier II Disposal Facility. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT. The file contains a reviewer-annotated December 2015 Status Report about portions of the contract relating to CAM-1, including a 30 July 2013 quality assurance inspection at this site. The file also contains a Quality Assurance Inspection Report regarding material from CAM-5 that was inspected at the Port of Ste-Catherine, QC, in March 2012. The CAM-1 report includes a copy of a Transport Canada Equivalency Certificate SU 11037, the CAM-5 report includes black-and-white photographic images, and both reports include shipping records, Certificates of Destruction, and similar documentation. Email in the file discusses deficiencies in the contractor's reporting and documentation, and shortcomings in DCC's provision of information to the DND Project Manager. A draft Record of Discussion from the 17 April 2014 preseason meeting discusses tracking of hazardous waste disposal and various other issues, including landfill monitoring, financial tracking, and administrative requirements for payment of travel costs. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT- NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; FOX-M HALL BEACH - NUNAVUT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT. The report (which is part of the QIKIQ15 Baffin Region DEW Line Site Monitoring project) was prepared by Golder and Associates, and was submitted to DND in March 2016. The report includes an overview of the methodology employed during the monitoring program (visual inspections, soil and groundwater sampling, thermal monitoring, and quality control), and provides the monitoring program results (landfill descriptions, visual inspections, and sampling results) for the four landfill areas located at CAM-5: the Lower Site Landfill - South, the Tier II Disposal Facility, the Non-Hazardous Waste Landfill, and the USAF & Asbestos Landfill. The report also includes the QA/QC Results of the monitoring program, as well as four appendices which provide further details about the landfill monitoring phase: the Report Limitations, the Field Records, the Laboratory Certificates of Analysis and QA/QC Report, and the Photograph Log (which includes copies of 180 photos of the site inspection). | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2016/03/31 |

The report shows the post-construction inspection and monitoring results for the 13 landfills at DYE-M: Lower Site NWS, Lower Site Tier II Disposal Facility, Lower Site Crossroads Landfill, Lower Site Foundation Landfill, Lower Site Powerhouse Landfill, Lower Site Non-Hazardous Waste Landfill (NHWL), Upper Site Tier II Disposal Facility, Upper Site West Landfill, Upper Site Pallet Line Landfill, Upper Site NHWL, Upper Site NWS Landfill, Upper Site South Landfill West, and the Upper Site Helipad Landfill. Included in this report is a general background to the monitoring program, an overall site plan, a land-use description, and the general methodologies used for sampling, inspection, and monitoring at the site. The section on the 2015 monitoring results from each of the 13 landfills include: a landfill description, visual inspection results, soil sampling results, groundwater sampling results, thermal monitoring results, technical drawings of sampling locations at the site, a stability assessment, and recommendations for modifications for the monitoring project. The appendices in this report is a limitation report, monitoring well sampling logs, thermistor inspection record sheets, certificates of analysis, laboratory data results, and a photographic log of site photographs from each of the 13 landfills at the site. Also included in this file is a CD titled QIKIQ15 Baffin Region DEW Line Site Monitoring - 2015 DYE-M Monitoring Report - Final. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2016/03/31 |

| 3836 | R112 | RG24 | 2021-00207-1 | 245 | 7690-DLCU001-F10694 | | BAR-1 | File pertains to BAR-1. The file contains an April 2014 final draft of the Former Fuel Spill Area Monitoring Summary report on BAR-1, prepared by ESG and AECOM. This version of the report contains critical handwritten marginalia. The report discusses remediation attempts, the ecological risk assessment of 2000, and the findings of monitoring efforts over the following decades. Appendices contain maps, analytical data, the post-remediation monitoring plan, and relevant meeting records of the Environmental Working Group (EWG) and of the DND-Inuvialuit Regional Corporation (IRC) Review Committee. The file also contains several other documents with maps, data, or working material regarding the Former Fuel Spill Area. Also found in the file is a DND 8 form regarding landfill monitoring contract 53924, and a document updating the scope of the monitoring to be carried out in 2015 at the BAR-1 Former Fuel Spill Area under this contract. Finally, the file contains a Public Works and Government Services Canada (PWGSC) invoice to DND under contract 40103865. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; PIN-1 CLINTON POINT - NWT; PIN-M CAPE PARRY - NWT. | 3846 | R112 | RG24 | 2021-00207-1 | 246 | 7690-DLCU001-F10704 | | The Collection of Landfill Monitoring Data at the Former PIN-2 Distant Early Warning Line Site - Cape Young, Nunavut - Revised Final Report 2016 (O/Ref.: CD3654) - (Y/Ref.: DLC MON (KITIK 13)) - Defence Construction Canada - April 2017 | File consists of a bound report on the collection of landfill monitoring data at the former PIN-2 DEW Line site. Report summarizes the findings from the 2016 inspection of the PIN-2 site and documents the performance of the remediated landfills at the site. Report contains sections on: outline, methodology, airstrip landfill, USAF landfill, station west landfill, Tier II soil disposal facility, airstrip south landfill, pallet line west landfill, non-hazardous waste landfill, south landfill I- east, and south borrow landfill. | Locations mentioned in the file include: PIN-2 CAPE YOUNG NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EnGlobe Corporation Quebec. | 2017/04/01-2017/04/30 |
| 3847 | R112 | RG24 | 2021-00207-1 | 246 | 7690-DLCU001-F10705 | | QIKIQ15 Baffin Region DEW Line Site Monitoring - 2016 FOX-5 Monitoring Report | File consists of a copy of the FOX-5 DEW Line Site Monitoring Report for the 2016 season (Year 10 of the Long Term Monitoring). The report was prepared by Golder and Associates in March 2017, for the benefit of DND. The report includes an overview of the approach and methodology employed during the monitoring program, as well as the results of the 2016 monitoring program for the three landfill areas located at FOX-5: the Station Non-Hazardous Waste Landfill, the Main Landfill, and the Middle Site Non-Hazardous Waste Landfill/Tier II Soil Disposal Facility. The monitoring program results include visual inspections, soil and groundwater sampling, and thermal monitoring, as well as an overall performance evaluation of the landfill locations, and the report provides recommendations for the later phases of the long-term monitoring project. The report concludes with a QA/QC Results section, and includes four appendices: the Report Limitations, the Field Records, the Laboratory Certificates of Analysis and QA/QC Reports (Historical Monitoring Results), and a Photograph Log, which contains 159 printed photographs of the monitoring program. | Locations mentioned in the file include: FOX-5 BROUGHTON ISLAND - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2017/03/01-2017/04/30 |

| 3848 | R112 | RG24 | 2021-00207-1 | 246 | 7690-DLCU001-F10706 | | Revised Update Human Health and Ecological Risk Assessment, Former Fuel Spill Area, BAR-1, Komakuk Beach, YT | File consists of the revised updated human health and risk assessment report for the former fuel spill area at BAR-1 prepared by Stantec Consulting Limited for Public Services and Procurement Canada in 2017. The report provides a human health risk assessment, an ecological risk assessment, and recommendations for the site. The report also includes appendices providing data on samples, a photolog, and sampling plan. There is also a CD copy of the report from July 20, 2017. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON. Organizations mentioned in the file include: Public Services and Procurement Canada; Stantec Consulting Limited. | 2017/07/05 |
| 3849 | R112 | RG24 | 2021-00207-1 | 246 | 7690-DLCU001-F10707 | | SRB & EPC | File pertains to Senior Review Board (SRB) meetings and Effective Project Close-Out (EPC). The file contains presentations for the SRB meetings of 31 January 2013 and 12 July 2017, minutes of the 31 January 2013 meeting, and material related to preparation for the 2017 meeting, especially email and other documentation discussing financial tracking practices and seeking to quantify historical DLCU expenditures. The file also contains version 4 (effective May 2014) of the Project Charter, a draft of Book 22 (which provides a detailed overview of the administrative history of the DLCU project), and a copy of the Close-Out Plan. One email makes a passing reference to a non-DLCU site, Goose Bay. | Locations mentioned in the file include: BAR-1 KOMAKUK BEACH - YUKON; BAR-2 SHINGLE POINT - YUKON; BAR-3 TUKTOYAKTUK - NWT; BAR-4 NICHOLSON PENINSULA - NWT; CAM-1 JENNY LIND ISLAND - NUNAVUT; CAM-2 GLADMAN POINT - NUNAVUT; CAM-3 SHEPHERD BAY - NUNAVUT; CAM-4 PELLY BAY - NUNAVUT; CAM-5 MACKAR INLET - NUNAVUT; CAM-M CAMBRIDGE BAY - NUNAVUT; DYE-M CAPE DYER - NUNAVUT; FOX-2 LONGSTAFF BLUFF - NUNAVUT; FOX-3 DEWAR LAKES - NUNAVUT; FOX-4 CAPE HOOPER - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; Other - Non-DEW Line Site PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT; PIN-3 LADY FRANKLIN POINT - NUNAVUT; PIN-4 BYRON BAY - NUNAVUT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; Environmental Sciences Group / Royal Military College RMC; Treasury Board of Canada; UMA Engineering. | 2013/01/31-2017/07/12 |
| 3850 | R112 | RG24 | 2021-00207-1 | 246 | 7690-DLCU001-F10708 | | CAM-5 Landfill Monitoring | File consists of a collection of 3 oversized (20 x 14) Record drawings concerning the DEW Line Clean Up of the FOX-2 Site. The technical drawings were prepared by AECOM and Hatch Limited in October 2007, for DND, and include a Record Drawing revision from November 19, 2012. The technical drawings were received by DCC on November 23, 2012. | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT; FOX-5 BROUGHTON ISLAND - NUNAVUT; PIN-1 CLINTON POINT - NWT; PIN-2 CAPE YOUNG - NUNAVUT. Organizations mentioned in the file include: AECOM Canada Limited; Defence Construction Canada Ltd Other; Department of National Defence; Dillon Consulting Ottawa; EBA Engineering Consultants; Indian and Northern Affairs Canada; Lakewood Systems Limited; Nunavut Tunngavik Incorporated. | 1996/01/01-2017/11/16 |

| 3852 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10710 | | The Collection of Landfill Monitoring Data at the Former PIN-4 Distant Early Warning Line Site - Byron Bay, Nunavut - Final Report - 2017 - (O/Ref.: CD3654) (Y/Ref.: DLC MON (KITIK 13)) - Defence Construction Canada - February 2018 | File consists of a bound final report on the collection of landfill monitoring data at the PIN-4 DEW Line in 2017. Report summarizes the findings of the 2017 inspection of landfills at the PIN-4 site. Report contains sections on: outline, methodology, northwest landfill, north landfill, non-hazardous waste landfill, station area landfill - west, USAF landfill, Tier II disposal facility, and airstrip landfill. | Locations mentioned in the file include: PIN-4 BYRON BAY - NUNAVUT. Organizations mentioned in the file include: Defence Construction Canada Ltd Other; EnGlobe Corporation Quebec. | 2018/02/01-2018/02/28 |
| 3853 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10711 | | ISR17 - DEW Line Site Monitoring - 2017 - BAR-2 Monitoring Report | File is the 2017 long-term monitoring report for post-construction inspection and landfill monitoring completed at the NWS, Ravine, Station Area, and USAF Landfills at the BAR-2 site. The report outlines the specific cleanup history of these 4 landfills, it shows overall site plans for BAR-2, and discusses the methodologies used for sampling at the landfills. Also included in this report are the 2017 visual monitoring results for each landfill, technical drawings associated with each landfill, visual inspection checklists, soil and groundwater sampling results, and a discussion on the validity of the results. The appendices in this report is: a report on the data limitations, field records for sampling logs, analytical results, certificates of analysis, a photographic log, copies of these photographs, and a user guide for Prolog 2 software. File also contains two CDs both titled Final 2017 BAR-2 Monitoring Report (secured and unsecured pdfs, MS Word Doc, data files, ACAD files and photo jpeg files). | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder; Lakewood Systems Limited. | 2018/03/28 |

| 3854 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10712 | | ISR17 DEW Line Site Monitoring - 2017 PIN-M Monitoring Report | File consists of a report by IMG Golder on the landfill monitoring carried out at PIN-M in 2017, particularly during a site visit on 14 August 2017. The report includes visual inspection checklists, maps, and comments on the overall performance of three landfills (Station Area Landfill and Extension, Main Landfill - West, and Main Landfill - East). Also found in the report are discussion and data regarding the soil sampling and groundwater sampling carried out at the Station Area Landfill and Extension. Appendices provide soil sampling logs, monitoring well logs, laboratory analysis reports, historical analytical data, and colour photographic images. | Locations mentioned in the file include: BAR-2 SHINGLE POINT - YUKON; PIN-1 CLINTON POINT - NWT; PIN-M CAPE PARRY - NWT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2018/03/28 |
| 3855 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10713 | | March 2018 - QIKIQ15 Baffin Region DEW Line Site Monitoring - 2017 CAM-5 Monitoring Report | File consists of a paper copy of the final Monitoring Report for the CAM-5 DEW Line site regarding the 2017 season (year 7 of the Monitoring Phase). The report (which is part of the QIKIQ15 Baffin Region DEW Line Site Monitoring project) was prepared by Golder and Associates, and was submitted to DND in March 2018. The report includes an overview of the methodology employed during the monitoring program (visual inspections, soil and groundwater sampling, thermal monitoring, and quality control), and provides the monitoring program results (landfill descriptions, visual inspections, and sampling results) for the four landfill areas located at CAM-5: the Lower Site Landfill - South, the Tier II Disposal Facility, the Non-Hazardous Waste Landfill, and the USAF & Asbestos Landfill. The report also includes the QA/QC Results of the monitoring program, as well as four appendices which provide further details about the landfill monitoring phase: the Report Limitations, the Field Records, the Laboratory Certificates of Analysis and QA/QC Report, and the Photograph Log (which includes copies of 211 photos of the site inspection). | Locations mentioned in the file include: CAM-5 MACKAR INLET - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2018/03/31 |

| 3856 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10714 | | March 2018 - QIKIQ15 Baffin Region DEW Line Site Monitoring - 2017 FOX-M Monitoring Report | File consists of a paper copy of the final Monitoring Report for the FOX-M DEW Line Site during the 2017 season. This report correlates to the Year 10 Monitoring Event, which is part of the Phase II Monitoring Program. The report (which is part of the QIKIQ15 Baffin Region DEW Line Site Monitoring project) was prepared by Golder and Associates, and was submitted to DND in March 2018. The report includes an overview of the methodology employed during the monitoring program (visual inspections, soil and groundwater sampling, thermal monitoring, and QA/QC), as well as provides the 2017 season monitoring program results for the eight landfill areas located at the FOX-M DEW Line Site: the Non-Hazardous Waste Landfill, the G217-West Landfill, the Billboards Landfill, the HAZMAT Storage-East Landfill, the Communications North Landfill, the Communications Northwest Landfill, the Tier II Disposal Facility, and the East Beach Landfill. The landfill summaries include visual inspections, summaries of any sampling deviations, and overviews of any landfill specific monitoring or sampling projects, as well as a conclusion which provides an overall performance of each landfill locations and presents recommendation for future monitoring phases. The report additionally includes the QA/QC Results of the monitoring program, as well as four appendices which provides further details about the landfill monitoring phase: the Report Limitations, the Field Records, the Laboratory Data, and the Photograph Log (which includes copies of 474 photos of the monitoring program/site inspection). | Locations mentioned in the file include: FOX-M HALL BEACH - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder; Public Services and Procurement Canada. | 2018/03/31 |

| 3857 | R112 | RG24 | 2021-00207-1 | 247 | 7690-DLCU001-F10715 | | QIKIQ15 Baffin Region DEW Line Site Monitoring - 2017 DYE-M Monitoring Report | File is a final signed bound report from Golder and Associates concerning the landfill monitoring at the DYE-M site for 2017. The report shows the post-construction inspection and monitoring results for the 13 landfills at DYE-M: Lower Site North Warning System (NWS) Landfill, Lower Site Tier II Disposal Facility, Lower Site Crossroads Landfill, Lower Site Foundation Landfill, Lower Site Powerhouse Landfill, Lower Site Non-Hazardous Waste Landfill (NHWL), Upper Site Tier II Disposal Facility, Upper Site West Landfill, Upper Site Pallet Line Landfill, Upper Site NHWL, Upper Site NWS Landfill, Upper Site South Landfill West, and the Upper Site Helipad Landfill. Included in this report is a general background to the monitoring program, an overall site plan, a land-use description, and the general methodologies used for health and safety, sampling, inspection, and monitoring at the site. The section on the 2017 monitoring results from each of the 13 landfills include: a landfill description, visual inspection results, soil sampling results, groundwater sampling results, thermal monitoring results, technical drawings of sampling locations at the site, and recommendations for modifications for the monitoring project. The appendices in this report is a limitation report, monitoring well sampling logs, thermistor inspection record sheets, soil sampling record sheets, certificates of analysis, laboratory data results, and a photographic log of site photographs from each of the 13 landfills at the site. | Locations mentioned in the file include: DYE-M CAPE DYER - NUNAVUT. Organizations mentioned in the file include: Department of National Defence; Golder and Associates / IMG-Golder. | 2018/03/31 |
