

Finding Aid/Aide de Recherche FA 30-236 (formerly RG30M 934002, FA part 2)

Note: This finding aid consists of 1000 + technical and architectural drawings created by the Grand Trunk Railway Motive Power Department, 1905-1916. (This was formerly designated as Series "M" & "L"). The finding aid includes the layouts of Mellville Station repair shop as well as layouts of locomotive shops and other structures at Point St Charles in Montreal, Quebec.

| Item | Scope and Content | Dates |
|-------------|---|--------------|
| 15L | Layout for new brass foundry | 1908 |
| 58T | Sketch of wheel lathe, Derring, Maine | 1905 |
| 61L | Gen Arrgt Boiler Room McGill St | 1908 |
| 62L | ... | |
| 82M | Sketch of saw bench | |
| 83M | Box spanners for hot water pumps for Tureat | |
| 121L | Central Power Station. Elevation to river bank | |
| 122L | Power station, north elevation. Pt. St. Charles | |
| 124L | Proposed foundry for Battle Creek | |
| 125L | Layout of Melville Station Repair Shop | 1907 |
| 126L | Layout of Repair Shop, Melville | 1907 |
| 127L | Rivers. Arrgt of machinery in round House Shop | 1908 |
| 200L | Proposed open hearth Shell Plant for castings etc | |
| 213L | Layout of locomotive shops. Pt St Charles | |
| 217M | Furnaces & tanks for tempering steel | 1909 |
| 219M | Oil furnace for heating tubes | 1909 |
| 225M | Bell for gates at level crossings | 1909 |

Finding Aid/Aide de Recherche FA 30-236 (formerly RG30M 934002, FA part 2)

Note: This finding aid consists of 1000 + technical and architectural drawings created by the Grand Trunk Railway Motive Power Department, 1905-1916. (This was formerly designated as Series "M" & "L"). The finding aid includes the layouts of Mellville Station repair shop as well as layouts of locomotive shops and other structures at Point St Charles in Montreal, Quebec.

| Item | Scope and Content | Dates |
|-------------|--|--------------|
| 234M | Proposed dumping ash pan for locomotives | 1909 |
| 237M | 1/2"-4 way cock, brass | 1909 |
| 269M | Alternative for driving engines 201-210 | |
| 278M | Vacuum end to replace water end, worthington pumps | 1909 |
| 284M | Weston 4 ton block patent gear | 1909 |
| 285M | details of 278M | |
| 286M | Oil reservoir, new Michigan bullseye lubricators | 1909 |
| 287M | | 1909 |
| 288M | Report on motors & engines in shop | 1909 |
| 289M | Indicator cards for stationary engines, Pt St | 1909 |
| 302M | Vacuum pump, details | 1909 |
| 303M | ... | |
| 304M | ... | |
| 305M | ... | |
| 306M | ... | |
| 307M | Link belt chain for McHenry coal chutes | 1909 |
| 309M | Brass valve plate for vacuum pump | 1909 |
| 318M | Valve details for vacuum pump | |

Finding Aid/Aide de Recherche FA 30-236 (formerly RG30M 934002, FA part 2)

Note: This finding aid consists of 1000 + technical and architectural drawings created by the Grand Trunk Railway Motive Power Department, 1905-1916. (This was formerly designated as Series "M" &"L"). The finding aid includes the layouts of Mellville Station repair shop as well as layouts of locomotive shops and other structures at Point St Charles in Montreal, Quebec.

| Item | Scope and Content | Dates |
|-------------|--|--------------|
| 319L | Proposed extension to Car dept Boiler House (2 dwgs) | 1909 |
| 320M | Proposed ramp for coal handling, Pt St Charles | 1909 |
| 328M | Standard drinking fountain for shops & roundhouses | 1909 |
| 329M | Packing for plunger of standard vacuum pump | |
| 330M | Crack in left hand head of boring mill | 1909 |
| 332M | Rubber rings for hydraulic plant | 1909 |
| 340M | Alteration to firebox of furnaces in Rolling mill | 1909 |
| 342M | Standard vacuum pump | 1909 |
| 346L | Shop turntable locking bolt & socket | 1909 |
| 355L | Plan of fire Station | 1909 |
| 358M | Lever gates for level crossings | 1909 |
| 359L | Condenser cellar & details of 3 way cock | 1909 |
| 362L | Proposed extension to Car Dept Boiler House | |
| 365M | Arrgt hydraulic pit jack | |
| 369M | Break in left hand head of boring mill | 1909 |
| 370M | Coal chute for general offices | 1911 |
| 383L | Proposed extension to Car Dept Boiler House | 1909 |
| 384L | Layout of shops. Pt St Charles | |

Finding Aid/Aide de Recherche FA 30-236 (formerly RG30M 934002, FA part 2)

Note: This finding aid consists of 1000 + technical and architectural drawings created by the Grand Trunk Railway Motive Power Department, 1905-1916. (This was formerly designated as Series "M" & "L"). The finding aid includes the layouts of Mellville Station repair shop as well as layouts of locomotive shops and other structures at Point St Charles in Montreal, Quebec.

| Item | Scope and Content | Dates |
|-------------|---|--------------|
| 386L | Car side boiler room, roof truss | |
| 387M | Main shaft of lever gates for level crossing | 1909 |
| 387L | Car side engine room, extension for generator | 1909 |
| 388M | Arrgt & details of ashpan for classes A,C&E | 1909 |
| 389M | | |
| 390L | Layout of shops. Pt St Charles (2 dwgs) | 1909 |
| 390M | Proposed exhaust nozzle for compound engines | |
| 391L | Roof truss for car side Boiler room | 1909 |
| 392L | Layout of new Brass Shop (2 dwgs) | 1910 |
| 394M | ... classes A,C&E | 1909 |
| 395L | Proposed central Power Plant... | 1910 |
| 397M | Arrgt & details of electric blue printing frame | 1909 |
| 398L | Proposed layout. Pt St Charles shops | |
| 399L | Proposed boiler layout for central Power Plant | 1909 |
| 400M | ... of cast iron floor in front of rumbler | 1910 |
| 401L | Power Plant. Pt St Charles West elevation | 1910 |
| 402L | ... North | |
| 404L | Plan of proposed foundry stores | 1910 |

Finding Aid/Aide de Recherche FA 30-236 (formerly RG30M 934002, FA part 2)
