PREFACE

This Records Classification Index has been prepared to provide a uniform basis whereby records of the Authority may be classified in a standard and systematic manner, and to encourage uniformity in the selection and identification of subject file titles.

This index is in two parts i.e. Part I in alphabetical order by subject and Part II in numerical sequence.

The Records Officer, Cornwall H.Q. is responsible for planning, co-ordinating of the Authority Records Classification System and as such is the only person authorized to make changes to this index.

To maintain this index on a current basis, amendments will be issued regularly by Cornwall H.Q. To assist in the up-dating process, Records offices are encouraged to review their files and suggest any changes/improvements that may prove required.
