INTRODUCTION

J 6 Series

Pamphlets and Clippings, 1876-1950. Originals, 42.1m (volumes 1-245).

The J6 Series is divided into two parts: King's pre-prime ministerial period (1876-1920) and the period during much of which he was prime minister (1921-1950). Since many subjects are common to both sections, it will be necessary to look at both portions. Additional material, found after the series had been organized, was put into volumes 241-245. Researchers should check this portion to verify if there is additional information available.

A wide variety of material is to be found in this series including all manner of pamphlets, catalogues, press clippings, advertising literature, programmes, etc. The subjects covered are many and varied. The files contain much information about King himself, Parliament, federal government departments elections, major Canadian and world events. However, there is much more than politics in this series. There are files on artists, cultural groups, social work, travel, and prominent Canadians in many fields. This series is a rich source of information on numerous aspects of Canadian and international life in the last portion of the nineteenth and the first half of the twentieth century.

WILLIAM LYON MACKENZIE KING PERSONAL CORRESPONDENCE SERIES
